QUESTION 1

During a discovery at a large company, the customer asks if they can run IntroSpect on a segment of the network and only monitor a small group of users and servers as a trial. As their IT staff becomes familiar with the analytics, they want to expand the installation to the entire enterprise. Would this be a valid option for the customer? (The customer can deploy the analyzer at the first site and use whitelist/blacklist functions to contain the scope of the analytics to the smaller site.)

- A. Yes
- B. No

Correct Answer: B

QUESTION 2

You were called into a customer site to do an evaluation of installing IntroSpect for a small business. During the discovery process, the customer asks you to explain when they would need to deploy a Packet Processor. Does this explain the function of the Packet Processor? (The packet Processor helps if they are using the analyzer deployed in the cloud by forwarding log data over HTTPS.)

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

In a conversation with a colleague you are asked to give them an idea of what type of monitor source you would use for each attack stage.

1. Reconnaissance
2. Entry or Compromise
3. Command and Control
4. Lateral Movement
5. Escalation
6. Execution

Would this be a correct correlation? (For "Command and Control" you can monitor DNS through network tap ports.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

Your company has found some suspicious conversations for some internal users. The security team suspects those users are communicating with entities in other countries. You have been assigned the task of identifying those users who are either uploading or downloading files from servers in other countries. Is this the best way to visualize conversations of suspected users in this scenario? (Visualizing Applications and Ports.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 5

You are planning to configure ClearPass to send endpoint context to IntroSpect. You need to create a checklist of functions that must be enabled in ClearPass to support this. Is this an option that is required? (Time Source Now as part of the authorization in the service.)

- A. Yes
- B. No

Correct Answer: A
