-  **800,000+** Satisfied Customers

QUESTION 1

You are administering an IntroSpect Installation. While monitoring the load on the IntroSpect Packet Processors, you think that one Packet Processor is overloaded. Is this a correct statement about the possible overload? (As a general rule, the data rate should be below 5000 event/sec.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 2

While reviving the logs at a customer site you notice that one particular device is accessing multiple servers in the environment, using a number of different user accounts. When you question the IT admin, they tell you that the computer is a JumpBox and running software used to monitor all of the servers in the environment.

Would this be a logical next step? (As a next step, you should audit all of the accounts that are being used on the JumpBox to determine if the JumpBox is being accessed by unauthorized accounts.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 3

While investigating alerts you notice a user entity has triggered a historical alert for Large Internal Data Download. While investigating the alert, you notice that the download came from a different device than normal for the user. Based on these conditions, is this a possible cause? (This is a classic user account take over pattern.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

An analyst notices that a disabled user account has been enabled. Is this an action that the analyst should take? (Allow the system to run for 15 days to establish a historical baseline, and determine if this account is a threat.)

A. Yes

B. No

Correct Answer: B

QUESTION 5

In a meeting with a customer that runs a fully automated manufacturing facility that is connected to the business and corporate offices, the operations manager asks why they need IntroSpect to monitor the manufacturing network. Is this a reason they should monitor the manufacturing network security? (The devices on the automation network are vulnerable to attack because they are highly functional and could be weaponized by an attacker and used to attack the corporate network.)

A. Yes

B. No

Correct Answer: A
