QUESTION 1

A network administrator connects several new Aruba Instant APs (at factory defaults) to a switch. After waiting several minutes for the cluster to form, the administrator is ready to provision the cluster. The VLAN on the ports connected to the APs has no DHCP services.

How can the administrator contact the Instant UI and provision the APs with static IP addresses?

- A. Connect to the Instant SSID and open a Web browser.
- B. Access the default IP address, 192.168.1.1, from a device connected in the AP VLAN .
- C. Access the cluster using Aruba Activate.
- D. Access <https://vc.arubanetworks.com> from a device connected in the AP VLAN.

Correct Answer: D

QUESTION 2

What is one benefit of the Aruba NMobile First Network?

- A. separation of wired access management and wireless access management
- B. better performance for Unified Communications (UC) solutions such as Microsoft Skype for Business
- C. convergence of Ethernet and storage technologies, such as Fibre Channel (FC)
- D. integrated support for Amazon Web Services (AWS) cloud services and Microsoft Azure

Correct Answer: B

QUESTION 3

Refer to the exhibit.

Exhibit 1

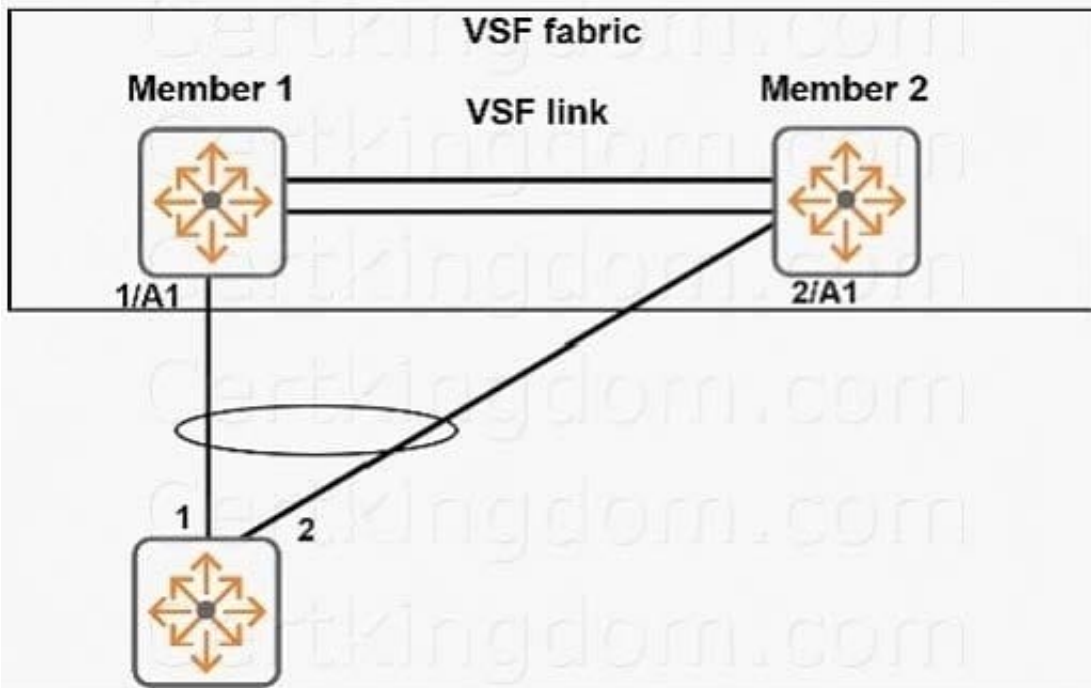

Exhibit 2

```
Switch-3# show trunks
Load Balancing Method: L3-based (default)
Port | Name | Type | Group | Type
-----+-----+-----+-----+-----
1 | VSF-member-1 | 100/1000T | Trk1 | LACP
2 | VSF-member-2 | 100/1000T | Trk1 | LACP
```

Which type of link aggregation should the network administrator configure on interfaces 1/A1 and 2/A1?

- A. a protocol-less trunk
- B. an LACP distributed trunk
- C. a distributed trunk
- D. a static LACP link aggregation

Correct Answer: A

QUESTION 4

Refer to the exhibit.

The exhibit shows the physical connection between two Aruba 5400R switches and a server. The network administrator is concerned about redundancy and wants to implement a solution like that shown on the right side of the exhibit. The administrator plans to use an LACP link aggregation with both links active. What must the administrator do first?

- A. Configure an LACP link aggregation between the switches.
- B. Enable dynamic link aggregation globally on the switches.
- C. Combine the switches into a Virtual Switching Framework (VSF) fabric.
- D. Configure the same operational key on both the switches.

Correct Answer: B

QUESTION 5

What is a benefit of HPE Network Optimizer in an Aruba network?

- A. It enables network devices to automatically prioritize Microsoft Skype for Business traffic flows.
- B. It enables network administrators to detect wired and wireless denial of service (DoS) attacks.
- C. It enables APs to distribute clients to the optimal AP for each client connection.
- D. It enables device profile deployment for Lync Hard Phones.

Correct Answer: A
