QUESTION 1

A port firewall policy is applied to a trunk port that denies controller access. An "allow all" VLAN firewall policy is applied to VLAN 33 on the same port. A user connected to VLAN 33 on that port attempts to gain access to the controller. Which of the following statements is true?

- A. The Port policy is applied, therefore no controller access
- B. The VLAN policy is applied, then the port policy, therefore no controller access
- C. The VLAN policy is applied, therefore access to the controller is allowed
- D. You cannot place a firewall policy on a Ports VLAN when the Port already has a policy, therefore no controller access
- E. When locally connected to a controller's port you always have controller access

Correct Answer: C

QUESTION 2

In which mode must an Aruba AP be provisioned to implement WIPS?

- A. Mesh
- B. Split-Tunnel
- C. Air Monitor
- D. Spectrum

Correct Answer: C

QUESTION 3

Which of the following configurations can accept a VLAN pool? (Choose two)

- A. Trunk native VLAN
- B. Virtual AP profile
- C. User Role
- D. Server derived role
- E. FW Policies

Correct Answer: BC

QUESTION 4

Examine this controller-configuration:

```
ip access-list session icmp-traffic any any svc-icmp permit
```

Which type of alias is used in this configuration?

- A. Category
- B. Network destination
- C. Network service
- D. ICMP server

Correct Answer: B

QUESTION 5

How is an AP redirected to a Local controller after DNS resolution returns the Master's IP address?

- A. Master looks at the AP-Group and CONTROLLER-IP attributes
- B. Master looks at the AP-Group and LMS-IP attributes
- C. In the AP-provisioning screen, the LMS-IP attribute must be set
- D. The AP must be statically configured to find the local controller
- E. In the AP-provisioning screen, set the CONTROLLER-IP attribute

Correct Answer: B
