- A. Tunnel
- B. Bridge
- C. Split-Tunnel
- D. Backup
- E. Standard

Correct Answer: DE

QUESTION 3

When creating a firewall rule on an Aruba controller, which parameter is optional?

- A. Destination
- B. Service
- C. Source
- D. Log
- E. Action

Correct Answer: D

QUESTION 4

Refer to the following configuration segment for this item. netdestination "internal" no invert network 172.16.43.0 255.255.255.0 position 1 range 172.16.11.0 172.16.11.16 position 2 ! ip access-list session "My-Policy" alias "user" alias "internal" service_any permit queue low ! A user frame is evaluated against this firewall policy with the following attributes:

Source IP: 172.17.49.3 Destination IP: 10.100.86.37 Destination Port: 80

Referring to the above file segment, how will the frame be handled by this firewall policy?

- A. The frame will be dropped because of the implicit deny all at the end of the netdestination definition.
- B. The frame will be dropped because of the implicit deny all at the end of the firewall policy.
- C. The frame will be forwarded because of the implicit permit all at the end of the firewall policy.
- D. The frame will be passed because there is no service specified in the firewall policy.
- E. The frame will be dropped because there is no service specified in the firewall policy.

Correct Answer: B

QUESTION 5

A user associated to an SSID with 802.1x using this server group. RadiusNY returned a standard radius attribute of filter-Id with a value of "employee". The user was placed in the guest Role. What statements below are correct? (Choose two.)

- A. The user was placed in the 802.1x authentication default Role guest
- B. The user was placed in the initial Role guest
- C. Role derivation failed because roles are case sensitive
- D. Role derivation failed because the incorrect operation "value-of" was used
- E. 802.1x authentication failed so the user was automatically placed in the guest Role

Correct Answer: AC
