QUESTION 1

Which technology enables a network administrator to group users by logical function instead of physical location, reduce bandwidth waste by limiting broadcast traffic, and improve security by isolating users at Layer2?

- A. 802.1X
- B. SNMPv3
- C. VLANs
- D. Virtual Switching Framework (VSF)

Correct Answer: D

QUESTION 2

Which standard for wireless connectivity supports both 2.4GHz and 5GHz?

- A. 802.11a
- B. 802.11ac
- C. 802.11g
- D. 802.11n

Correct Answer: D

QUESTION 3

A company has ArubaOS switches that are already configured to support the network. The company now wants to use Aruba AirWave to manage the switches. The network administrator creates a new group on Aruba AirWave, and then discovers several ArubaOS switches that should belong to this group.

What is the best practice for the initial authorization of the switches in AirWave?

- A. Authorize the switches in Monitor + Firmware Updates only mode.
- B. Authorize the switches and immediately change the scan set credentials to match the credentials on the switches.
- C. Authorize the switches and immediately change the global communication settings to match the credentials on the switches.
- D. Authorize the switches in Managed Read/Write mode.

Correct Answer: D

QUESTION 4

For which task does a network administrator need to access the enable context on an ArubaOS switch?

- A. to view interface statistics
- B. to view CPU statistics
- C. to ping an IP address
- D. to view configuration files

Correct Answer: D

QUESTION 5

A retail company needs a quick way to deploy network infrastructure to new sites.

Which Aruba solutions provide Zero Touch Provisioning (ZTP) for Aruba Instant APs (IAPs) and ArubaOS switches?

- A. Aruba AirWave and Aruba Activate
- B. Aruba Meridian and Aruba ALE
- C. Aruba AirWave and Aruba Central
- D. Aruba Activate and Aruba Meridian

Correct Answer: A
