QUESTION 1

A network engineer plans a beacon deployment with Aruba blue dot location-based services. The deployment uses both battery-powered and USB beacons.

What is a primary difference between battery-powered beacons and USB beacons that is useful for the engineer to know for this deployment?

- A. USB beacons do not need to be connected to a power source, but battery-powered beacons do.
- B. Battery-powered beacons do not need to be connected to an external power source, but USB beacons do.
- C. Battery-powered beacons can be configured as location beacons. But USB beacons cannot.
- D. USB beacons can be remotely managed, but battery-powered beacons cannot.

Correct Answer: B

QUESTION 2

A hotel network engineer wants to create a Meridian-powered app to provide users with information about restaurants, hotel rooms, and activities at the hotel. Blue dot wayfinding is not required for the deployment, but the venue would like users to get directions from one area of the hotel to another area in the hotel.

Which types of apps meet these needs? (Select two.)

- A. informational only
- B. beacons enabled
- C. location aware
- D. blue dot enabled
- E. self-guided wayfinding

Correct Answer: BC

QUESTION 3

What is the purpose of a service on ClearPass?

- A. to define what to do with incoming authentication requests
- B. to indicate where to send the authentication request
- C. to define the role to apply to an authenticated user
- D. to pass authentication information to ClearPass

Correct Answer: A

QUESTION 4

An app developer wants to create a new campaign for a venue app. What is the first step the developer must take to create the campaign?

- A. Click on the proximity beacon on the map and associate it to a campaign.
- B. Create a title for the campaign in the Meridian Editor.
- C. Configure a proximity beacon for the campaign with the Beacons App.
- D. Create a name for the campaign with the Beacons App.

Correct Answer: B

QUESTION 5

A Meridian app developer creates an informational-only app for visitors to a stadium venue. Which Meridian app component should the app developer create in the Meridian Editor to enable turn-by-turn directions?

- A. Portal
- B. Event
- C. Page
- D. Placemark

Correct Answer: D
