QUESTION 1

A customer has an Aruba Wi-Fi deployment with 20 AP-325s around their 100,000 square foot (9,290.30 square meter) facility. The customer now wants to implement Aruba location services with the use of a venue Meridian app, along with Bluetooth as the technology for positioning.

Which type of information should the network administrator share with the customer to prepare them to meet their goal?

A. The customer can use their AP-325s as beacons, but may require more battery- powered beacons for an optimized indoor positioning deployment

B. The customer will not need to purchase any more equipment since they already have AP-325s

C. The customer will need to purchase USB beacons for management, but otherwise their AP-325s will handle the indoor positioning.

D. The customer will need to swap out their AP-325 deployment with battery-powered beacons, as they cannot be mixed in a deployment.

Correct Answer: C

QUESTION 2

A customer plans to deploy beacon management for their Aruba mobile engagement solution. The customer has five beacons in the store used for proximity push notifications, all of which are located within a 5,000 square foot (464.52 square meter) area. The store has a total of 50,000 square feet (4,645.15 square meters). The customer plans to purchase AP-325s to fulfill the beacon management requirements.

How many AP-325s will the customer need to purchase?

A. 1

B. 2

C. 20

D. 50

Correct Answer: C

QUESTION 3

Campaigns can be tied to which beacons types?

A. placed location beacon

B. placed proximity beacon

C. unplaced location beacon

D. unplaced proximity beacon

Correct Answer: B

QUESTION 4

A network engineer plans an OAuth login scenario with ClearPass for mobile device authentication with a venue app. Which step occurs first?

A. The client device sends a token to the info URL.

B. The client device requests a token.

C. The user creates a guest user in ClearPass.

D. The user logs into the Meridian app.

Correct Answer: A

QUESTION 5

What are the purposes of a node in Meridian routing? (Select two.)

A. to indicate the exit from a building

B. to add a placemark to a route

C. to determine the preferred route

D. to add portals connecting different floors E. to mark the start and end of a route

Correct Answer: BE
