QUESTION 1

A company has two buildings on a campus that are approximately 700 feet (214 meters) apart with a clear line of site. No fiber exists between the buildings; however, there is a need for connecting the networks in the buildings together. The

connection between the two buildings will need to support peak rates over 1 Gbps.

Which solution should the company choose that will meet their requirements as well as being cost-effective?

- A. Two outdoor AP 367s
- B. Two outdoor AP 387s
- C. Two outdoor AP 510s
- D. Multi-mode fiber between campus switches

Correct Answer: A

QUESTION 2

When determining a customer's agenda and clarifying their expectations for a new HPE/Aruba deployment, which two questions should be asked during the stakeholder checklist? (Select two.)

- A. What business problems are you trying to solve?
- B. What is the networking experience of onsite personnel?
- C. Which help desk system is deployed?
- D. Is a request for proposal or actual bill of materials (BOM) required?
- E. What is your anticipated growth of the environment?

Correct Answer: AD

QUESTION 3

A customer has a need to track traffic patterns and anomalies on a pair of ArubaOS-CX 8400 series switches. Which technology will the customer need to deploy for these switches?

- A. Mobility First
- B. NetEdit
- C. Network Analysis Engine
- D. ClearPass

Correct Answer: B

QUESTION 4

A network architect plans to implement channel bonding in a new wireless design that involves dense deployment of APs. Which channel width would be optimal for this design?

- A. 40 MHZ
- B. 10MHZ
- C. 20 MHz
- D. 60 MHZ

Correct Answer: D

QUESTION 5

A wiring closet with a POE+ switch is 250 feet (76 meters) away from an AP on a building floor. The AP's smart-rate port is connected to a smart-rate port on the switch, which is capable of 10 Gbps. The cable type is Cat5e STP.

What is the maximum speed that the customer can expect from the connected AP?

- A. 2.5 Gbps
- B. 1 Gbps
- C. 5 Gbps
- D. 10 Gbps

Correct Answer: A
