### QUESTION 1

An Aruba solution runs ArubaOS 8 and uses a mobility master architecture. Which feature can network administrators use to balance wireless devices across APs on different channels?

- A. AirMatch
- B. Client Match
- C. AppRF
- D. ARM

Correct Answer: B

---

### QUESTION 2

A company has an Aruba solution. The company wants to support a guest WLAN with the internal captive portal, but the company also wants to develop their own custom portal pages. What correctly describes the level of customization that the internal captive portal supports?

- A. The internal captive portal must use the default pages without modification, but administrators can upload pages developed externally.
- B. Administrators can modify the default internal captive portal pages, but cannot upload pages developed externally.
- C. Administrators can modify the default internal captive portal pages or upload pages developed externally.
- D. The internal captive portal must use the default pages without modification, and administrators cannot upload pages developed externally.

Correct Answer: C

---

### QUESTION 3

A network administrator needs to configure firewall rules for three roles:

1.  
Finance
2.  
Sales
3.  
Employee

Several rules apply to both the Employee and Sales roles, but not to the Finance role. What is the simplest way to configure these rules?

- A. Define the Employee and Sales roles as internal roles, and then configure the rules as global rules for internal users.

- B. Apply these rules as a subnet-based policy, and then ensure that only Employee and Sales users are assigned IP addresses in that subnet.
- C. Select either the Employee or Sales role, and then configure these rules within the global policy.
- D. Create a policy with these rules, and then apply that policy to the Employee and Sales roles.

Correct Answer: D

---

#### QUESTION 4

A company has an Aruba solution that is monitored by AirWave. Several users have recurring connectivity and performance issues with their wireless clients. How can network administrators use AirWave to monitor these clients more easily?

- A. Specify the clients as Watched Clients and view the tables and graphs for these clients.
- B. Click the Down icon in the Airwave banner to quickly see a list of issues with client connections.
- C. Use the Client > Tags windows to tag the client for periodic checks and analysis.
- D. Run Device Summary reports and filter for the client MAC addresses within the report.

Correct Answer: B

---

#### QUESTION 5

A company has a Mobility Master (MM)-based solution. A network administrator wants to monitor the types of applications in use in the wireless network. Which dashboard page in the MM interface should the administrator visit?

- A. Security
- B. Performance
- C. Traffic Analysis
- D. Network

Correct Answer: C
