QUESTION 1

An administrator wants to implement the MultiZone feature in a company's network to segregate corporate and guest traffic. Corporate traffic will have APs establish connections to a cluster managed by a Mobility Master (MM), and guest traffic will have the same APs establish connections to a standalone controller at the company's DMZ.

Given this scenario, what is true about the implementation of Multizone?

- A. A management session is established only with the primary zone, but data sessions are established to all zones.
- B. Only the primary zones can reboot, upgrade, or provision MultiZone APs.
- C. The primary and data zones must be in the same L2 subnet.
- D. A MultiZone AP can initially connect to any zone to obtain its configuration.

Correct Answer: B

QUESTION 2

A Microsoft RADIUS server is used to centralize AAA functions by a company. Upon a successful authentication lookup performed by an Aruba Mobility Controller (MC), the administrator wants to have the RADIUS server pass back the correct post-authentication role name that the controller should apply to the user's traffic.

Which additional task must the administrator perform for the controller's configuration to implement this process?

- A. Install ClearPass's VSA file on the controller.
- B. Install Microsoft's VSA file on the controller.
- C. Configure the server-derived rules on the controller.
- D. Enable AAA on the controller.

Correct Answer: C

QUESTION 3

An administrator mistakenly configures the wrong VLAN setting on a managed controller's interface. This causes the controller to lose management access to the Mobility Master (MM).

Which mechanism will then attempt to restore the previous working configuration on the managed controller?

- A. disaster recovery
- B. auto-rollback

- C. restore config
- D. bulk configuration

Correct Answer: B

QUESTION 4

An administrator configures Unified Communications and Collaboration (UCC) heuristics mode on an Aruba Mobility Master (MM). What should be modified in order to send items such as VoIP sessions and monitored information about adds, updates, deletions, and periodic snapshots of those VoIP sessions on the MM or the Aruba Mobility Controller (MC)?

- A. OpenFlow Controller profile
- B. Mgmt Config profile
- C. Skype ALG Configuration profile
- D. OpenFlow profile

Correct Answer: B

QUESTION 5

An administrator deploys Aruba Mobility Controller 7005s to a company's branch offices. The administrator wants to disable the console port to prevent unauthorized access to the controllers.

Which controller command should the administrator use to implement this policy?

- A. no console enable
- B. no mgmt-user console
- C. mgmt-user console-block
- D. console disable

Correct Answer: C
