**QUESTION 1**

Refer to the exhibit.

## Web Login (Guest Network)

### Use this form to make changes to the Web Login Guest Network.

| Web Login Editor | |
|---|---|
| * Name: | Guest Network<br>Enter a name for this web login page. |
| Page Name: | arubalogin<br>Enter a page name for this web login.<br>The web login will be accessible from "/guest/page_name.php". |
| Description: | Comments or descriptive text about the web login. |
| * Vendor Settings: | Aruba Networks<br>Select a predefined group of settings suitable for standard network configurations. |
| Login Method: | Controller-initiated — Guest browser performs HTTP form submit<br>Select how the user's network login will be handled.<br>Server-initiated logins require the user's MAC address to be available, usually from the captive portal redirection process. |
| * Address: | securelogin.arubanetworks.com<br>Enter the IP address or hostname of the vendor's product here. |
| Secure Login: | Use vendor default<br>Select a security option to apply to the web login process. |
| Dynamic Address: | ☐ The controller will send the IP to submit credentials<br>In multi-controller deployments, it is often required to post credentials to different addresses made available as part of the original redirection.<br>The address above will be used whenever the parameter is not available or fails the requirements below. |

Where will the guests browser be redirected during a captive portal login attempt?

A. The redirect will time out and fail to resolve.

B. The captive portal page hosted on Aruba Central in the cloud.

C. The captive portal page hosted on the Aruba controller.

D. The captive portal page hosted on ClearPass.

Correct Answer: B

**QUESTION 2**

Aruba self-registration with sponsorship is a solution best applied to which type of network?

A. a large corporate environment with hundreds of contractors requiring wireless access to printers and internet but no other guest access is allowed

B. a chain of auto part stores where employees are assigned mobile devices using a Mobile Device Manager (MDM) and public wireless is available for customers

C. a hotel where hundreds of guests are checked in and out of the building daily that may want access to wireless

internet

D. a chain of coffee shops using in a public downtown area with a high amount of guest turnover needing access to public wireless

Correct Answer: A

**QUESTION 3**

Refer to the exhibit.

A client is attempting to authenticate using their Windows account with a bad password. If the Remote Lab AD server is down for maintenance, what will be the expected result?

A. ClearPass receives a timeout attempt when trying the Remote Lab AD server first. It will then try the server Backup 1 and receive a result of Active Directory Authentication failed. No further processing will occur.

B. ClearPass try either server Backup 1 or Backup 2 depending on which has responded the fastest in prior attempts to authenticate ClearPass will then receive a result of Active Directory Authentication failed. No further processing will occur.

C. ClearPass receives a timeout attempt when trying the Remote Lab AD server first. It will then try the server Backup 1 and Backup 2; both will send a result authentication failed.

D. ClearPass receive a timeout attempt when trying the Remote Lab AD server first. No further processing will occur until the Remote Lab AD server is marked as "Down" by the Administrator.

Correct Answer: A

**QUESTION 4**

Refer to the exhibit.
