### QUESTION 1

Universal containers (UC) wants to integrate a Web application with salesforce. The UC team has implemented the Oauth web-server Authentication flow for authentication process. Which two considerations should an architect point out to UC? Choose 2 answers

- A. The web application should be hosted on a secure server.
- B. The web server must be able to protect consumer privacy
- C. The flow involves passing the user credentials back and forth.
- D. The flow will not provide an Oauth refresh token back to the server.

Correct Answer: AB

---

### QUESTION 2

Universal Containers (UC) implemented SSO to a third-party system for their Salesforce users to access the App Launcher. UC enabled "User Provisioning" on the Connected App so that changes to user accounts can be synced between Salesforce and the third party system. However, UC quickly notices that changes to user roles in Salesforce are not getting synced to the third-party system.

What is the most likely reason for this behaviour?

- A. User Provisioning for Connected Apps does not support role sync.
- B. Required operation(s) was not mapped in User Provisioning Settings.
- C. The Approval queue for User Provisioning Requests is unmonitored.
- D. Salesforce roles have more than three levels in the role hierarchy.

Correct Answer: A

---

### QUESTION 3

Universal containers (UC) uses a legacy Employee portal for their employees to collaborate and post their ideas. UC decides to use salesforce ideas for voting and better tracking purposes. To avoid provisioning users on Salesforce, UC decides to push ideas posted on the Employee portal to salesforce through API. UC decides to use an API user using Oauth Username - password flow for the connection. How can the connection to salesforce be restricted only to the employee portal server?

- A. Add the Employee portals IP address to the Trusted IP range for the connected App
- B. Use a digital certificate signed by the employee portal Server.
- C. Add the employee portals IP address to the login IP range on the user profile.

D. Use a dedicated profile for the user the Employee portal uses.

Correct Answer: A

#### QUESTION 4

Northern Trail Outfitters wants to implement a partner community. Active community users will need to review and accept the community rules, and update key contact information for each community member before their annual partner event.

Which approach will meet this requirement?

- A. Create tasks for users who need to update their data or accept the new community rules.
- B. Create a custom landing page and email campaign asking all community members to login and verify their data.
- C. Create a login flow that conditionally prompts users who have not accepted the new community rules and who have missing or outdated information.
- D. Add a banner to the community Home page asking users to update their profile and accept the new community rules.

Correct Answer: C

#### QUESTION 5

Universal containers wants to implement SAML SSO for their internal salesforce users using a third-party IDP. After some evaluation, UC decides not to set up my domain for their salesforce.org. How does that decision impact their SSO implementation?

- A. Neithersp - nor IDP - initiated SSO will work
- B. Either sp - or IDP - initiated SSO will work
- C. IDP - initiated SSO will not work
- D. Sp-Initiated SSO will not work

Correct Answer: D
