QUESTION 1

Universal Containers (UC) plans to use a SAML-based third-party IdP serving both of the Salesforce Partner Community and the corporate portal. UC partners will log in to the corporate portal to access protected resources, including links to Salesforce resources. What would be the recommended way to configure the IdP so that seamless access can be achieved in this scenario?

- A. Set up the corporate portal as a Connected App in Salesforce and use the Web server OAuth flow.
- B. Configure SP-initiated SSO that passes the SAML token upon Salesforce resource access request.
- C. Set up the corporate portal as a Connected App in Salesforce and use the User Agent OAuth flow.
- D. Configure IdP-initiated SSO that passes the SAML token upon Salesforce resource access request.

Correct Answer: D

QUESTION 2

Universal Containers want users to be able to log in to the Salesforce mobile app with their Active Directory password. Employees are unable to use mobile VPN.

Which two options should an identity architect recommend to meet the requirement?

Choose 2 answers

- A. Active Directory Password Sync Plugin
- B. Configure Cloud Provider Load Balancer
- C. Salesforce Trigger and Field on Contact Object
- D. Salesforce Identity Connect

Correct Answer: AD

QUESTION 3

Northern Trail Outfitters would like to use a portal built on Salesforce Experience Cloud for customer self-service. Guests of the portal be able to self-register, but be unable to automatically be assigned to a contact record until verified.

External Identity licenses have been purchased for the project.

After registered guests complete an onboarding process, a flow will create the appropriate account and contact records for the user.

Which three steps should an identity architect follow to implement the outlined requirements?

Choose 3 answers

- A. Enable "Allow customers and partners to self-register".

- B. Select the "Configurable Self-Reg Page" option under Login and Registration.
- C. Set jp an external login page and call Salesforce APIs for user creation.
- D. Customize the self-registration Apex handler to temporarily associate the user to a shared single contact record.
- E. Customize me self-registration Apex handler to create only the user record.

Correct Answer: ABE

QUESTION 4

Universal Containers (UC) has an existing Salesforce org configured for SP-Initiated SAML SSO with their Idp. A second Salesforce org is being introduced into the environment and the IT team would like to ensure they can use the same Idp for new org. What action should the IT team take while implementing the second org?

- A. Use the same SAML Identity location as the first org.
- B. Use a different Entity ID than the first org.
- C. Use the same request bindings as the first org.
- D. Use the Salesforce Username as the SAML Identity Type.

Correct Answer: B

QUESTION 5

A financial services company uses Salesforce and has a compliance requirement to track information about devices from which users log in. Also, a Salesforce Security Administrator needs to have the ability to revoke the device from which users log in.

What should be used to fulfill this requirement?

- A. Use multi-factor authentication (MFA) to meet the compliance requirement to track device information.
- B. Use the Activations feature to meet the compliance requirement to track device information.
- C. Use the Login History object to track information about devices from which users log in.
- D. Use Login Flows to capture device from which users log in and store device and user information in a custom object.

Correct Answer: B
