QUESTION 1

Northern Trail Outfitters (NTO) uses different shipping services for each of the 34 countries it serves. Services are added and removed frequently to optimize shipping times and costs. Sales Representatives serve all NTO customers globally and need to select between valid service(s) for the customer\\'s country and request shipping estimates from that service.

Which two solutions should an architect propose? Choose 2 answers

A. Use Platform Events to construct and publishshipper-specific events.

B. Invoke middleware service to retrieve valid shipping methods.

C. Use middleware to abstract the call to the specific shipping services.

D. Store shipping services in a picklist that is dependent on a country picklist.

Correct Answer: BC

QUESTION 2

Northern Trail Outfitters uses a custom Java application to display code coverage and test results for all of their enterprise applicationsand is planning to include Salesforce as well. Which Salesforce API should an Integration Architect use to meet the requirement?

A. SOAP API

B. Analytics REST API

C. Metadata API

D. Tooling API

Correct Answer: D

Explanation: https://developer.salesforce.com/docs/atlas.en-us.api_tooling.meta/api_tooling/tooling_api_objects_apexcodecoverage.htm

QUESTION 3

A new Salesforce program has the following high level abstract requirement: Business processes executed on Salesforce require data updates between the internal systems and Salesforce. Which three relevant details should a Salesforce Integration Architect seek to specifically solve for Integration architecture needs of the program? Choose 3 answers

A. Source and Target system, Directionality, data volume and transformation complexity long with any middleware that can be leveraged.

B. Integration skills, SME availability and Program Governance details.

C. Timing aspects - real-time/near real-time (synchronous or asynchronous), batch; update frequency.

D. Integration Style Process based, Data based, Virtual integration. E Core functional and non functional requirements for User Experience design, Encryptionneeds, Community, and license choices.

Correct Answer: ACD

QUESTION 4

The Sales Operations team at Northern Trail Outfitters imports new leads each day. An integrated legacy territory management system assigns territories to leads before Sales team memberscan work on them. The current integration often experiences latency issues.

Which two recommendations should an Architect make to improve the integration performance? Choose 2 answers

A. Reduce batch size of asynchronous BULK API.

B. Reduce batch size of synchronous BULK API.

C. Legacy system should submit in serial mode.

D. Legacy system should submit in parallel mode.

Correct Answer: AD

QUESTION 5

Universal Containers (UC) uses Salesforce to track the following customer data:

1.

 Leads,

2.

 Contacts

3.

 Accounts

4.

 Cases

Salesforce is considered to be the system of recordfor the customer. In addition to Salesforce, customer data exists in an Enterprise Resource Planning (ERP) system, ticketing system, and enterprise data lake. Each of these additional

systems have their own unique identifier. UC plans on using middleware to integrate Salesforce with the external

systems.

UC has a requirement to update the proper external system with record changes in Salesforce and vice versa.

Which two solutions should an Integration Architect recommend to handle this requirement? Choose 2answers

A. Locally cache external ID\\'S at the middleware layer and design business logic to map updates between systems.

B. Store unique identifiers in an External ID field in Salesforce and use this to update the proper records across systems.

C. Use Change Data Capture to update downstream systems accordingly when a record changes.

D. Design an MDM solution that maps external ID\\'s to the Salesforce record ID.

Correct Answer: CD
