QUESTION 1

Universal Containers (UC) is planning to roll out a new Force.com app to a regional business unit. UC has partial copy and a full sandbox available for deployment. UC's Architect has been asked to design an environment strategy for integration testing and performance testing, as well as user acceptance testing. What is the recommended use of available sandbox types that an Architect should consider?

- A. Use the partial copy for performance testing and full sandbox for integration and user acceptance testing.
- B. Use the full sandbox for performance and user acceptance testing and the partial copy for integration testing.
- C. Use the full sandbox for integration testing and the partial copy for user acceptance and performance testing.
- D. Use the full sandbox for user acceptance testing and use the partial copy for integration and performance testing.

Correct Answer: B

QUESTION 2

Universal Containers (UC) has an existing web-based application that a group of employees use on a regular basis. These employees often have Salesforce and the web-based application open and find themselves manually moving the data between both. UC would like the two systems to be integrated so that the employees will see all the data in one screen without the need for manually updating the data.

What integration pattern can help accomplish this requirement?

- A. Use the Force.com canvas framework to embed the external application into Salesforce.
- B. Use Streaming API to create a push topic to send the message to the external system asynchronously.
- C. Use Rest API to pull data from Salesforce and update the external application.

Correct Answer: A

QUESTION 3

A company is planning on sending orders from Salesforce to a fulfillment system. The integration architect has been asked to plan for the integration. Which two questions should the integration architect consider? Choose 2 answers

- A. Can the fulfillment system create new addresses within the Order Create service?
- B. Can the fulfillment system make a callback into Salesforce?
- C. Can the fulfillment system implement a contract-first Outbound Messaging interface?
- D. Is the product catalog data identical at all times in both systems?

Correct Answer: BC

QUESTION 4

Universal Containers merges with Planetary Shipping. They decide to consolidate their systems and migrate all the customer accounts into one Salesforce org. After some data analysis, they find out that their systems have common accounts that they would like to merge and avoid duplicate accounts in Salesforce. They find out that customer email, available in both the systems, can be used to match common accounts. The customer data can be exported as CSV files from their systems. Which two options should be considered to load accounts into Salesforce and eliminate duplicate accounts? Choose 2 answers

- A. ETL tool that is capable of identifying common accounts using email address and performs updates
- B. Dataloader upsert operation with a custom External ID field containing the email address
- C. ETL tool that is capable of identifying common accounts using a Salesforce ID and performing updates
- D. Dataloader insert operation and Salesforce's native deduplication after the load

Correct Answer: AB

QUESTION 5

Universal Containers acquires planetary shipping and decides to migrate all customer contacts of planetary Shipping into Universal Containers Salesforce org. Due to the lack of common unique identifier, they decide that a combination of first name, last name and street address could be used as a key to identify duplicate contacts. These three fields are populated on all contacts in both the systems.

Which two methods should be considered to load contacts into Universal Containers org and avoid creation of duplicate contacts?

Choose 2 answers

- A. Create a new text field to contain a hashed value for (first name+last name + street number) in Universal containers org and define it as External ID.
- B. Create an indexed formula field for (first name+last name + street number) so that a search can be done on the key before loading records.
- C. Create a new formula field for (first name+last name + street number) in universal containers org and use it as External ID.
- D. Create no new fields, but define the three fields (first name+last name + street number) as External IDs in universal Containers org.

Correct Answer: AB
