Your customer is competing in a Government Tender which specifies Infiniband modules. Which of the following list of boards can support Infiniband I/O Modules such as the AX10000? (Select ALL that apply).

- A. Intel Server Board S2600CW
- B. Intel Server Board S1200V3RP
- C. Intel Server Board S2600KP
- D. Intel Server Board S1200V5SP
- E. Intel Server Board S2600WT

Correct Answer: CE

QUESTION 3

A customer has a server based on the Intel Server System R2312WTTYS with the RAID C600 Upgrade Key RKSATA4R5, running Microsoft Windows 2012 R2. The customer has been using it for more than six months, as the company's primary domain controller, but recently it has started randomly rebooting. Which of the following are relevant questions to ask? (Select ALL that apply).

- A. Did they recently install new software?
- B. Do they have a battery backup unit installed?
- C. Is this server also running DHCP?
- D. Did they recently install new hardware?
- E. Did they recently add more servers to their network?
- F. Are automatic updates enabled in Windows?
- G. Did they recently add more users to their domain?

Correct Answer: ADF

QUESTION 4

The BMC System Event Log usually contains two types of information, Assertion and De-assertion. Assertion means an event is triggered and de-assertion means the status has recovered and the event has been withdrawn.

- A. True
- B. False

Correct Answer: A

QUESTION 5

As an Intel® Server Specialist you have been asked to advise your customer about the benefits of RAID; in particular to explain the differences when comparing hardware RAID over software RAID.

How would you answer from the list below? (Select ALL that apply).

- A. Nonvolatile
- B. It has dedicated resources
- C. Write-back capability, protected by BBU
- D. It has a faster connection speed to storage
- E. Additional RAID levels are available

Correct Answer: BCE
