QUESTION 1

A customer has a server based on the Intel Server System R2312WTTYS with the RAID C600 Upgrade Key RKSATA4R5, running Microsoft Windows 2012 R2. The customer has been using it for more than six months as the company\'s primary domain controller, and recently it has started randomly rebooting. Which of the following are relevant tools to use to find the cause of the issues? (Select ALL that apply).

A. Windows Sysinfo utility

B. Intel low level debug utility

C. BIOS debug using IPT

D. Windows event log

E. EFI SELView utility

F. EFI Syscfg utility

G. Intel Raid Web Console debug tookit

Correct Answer: ADE

QUESTION 2

Which of the following applies to the term Unified Data Centre Fabric? (Select ALL that apply).

A. A convergence of different network protocols, such as iSCSI and FCoE to integrate seamlessly into an existing infrastructure.

B. SAN connectivity to all servers using FCoE without the need to invest in dedicated fibre channel HBAs or a secondary infrastructure.

C. iSCSI storage dedicated to each server in the fabric.

D. Data Centre Bridging does not allow lossless traffic via Ethernet making it suitable for SAN traffic.

E. NAS connectivity for each of the connected servers in the fabric.

Correct Answer: AB

QUESTION 3

A customer is not able to enter the RAID BIOS setup utility for an onboard controller. Which of the following troubleshooting steps should an Intel Server Specialist take when trying to resolve the customer\'s issue?

a.

 Disable quiet boot.

b.

Check mhether the RAID 5 actvaton key is installed.

c.

Make sure the customer is only using SATA drives.

d.

Update the system BIOS to the latest version.

e.

Check the mass storage controller mode in BIOS setup.

f.

Verif y the HSBPA cable is connected.

g.

Verif y the SGPIO cable is connected.

h.

Verif y there are disks connected to the motherboard.

A.

b,e,h

B.

a,e,h

C.

c,d,e

D.

a,e,f

Correct Answer: B

QUESTION 4

As an Intel Server Specialist you are being asked to list some of the benefits of the IPMI solution as used in the IPDC environment. Please select one of the following.

A. Serial over LAN for system remote console access

B. Remote management via LAN: Remote power onoffreset, read SEL, Sensor status (system health)

C. SNMP traps (LAN alerts) and Platform Event Filtering

D. Asset management and Server Unit location identification (through FRU information)

E. All of the above

Correct Answer: E

QUESTION 5

Your customer wants to build a data center and is looking for space-efficient solutions, which will accommodate cloud infrastructure as they start to build it out. As an Intel Server specialist which of the following products would you advise for this, given the need for space-efficiency as well as maximum memory density?

A. Intel Server System R1208WTTGS

B. Intel Server Board S2600GZ

C. Intel Compute Module HNS2600TP

D. Intel Compute Module HNS2600KP

Correct Answer: C
