Following Questions and Answers are all new published by CompTIA Official Exam Center

**QUESTION 1**

Intel Active System Console provides a lightweight management console for use with Intel?Server Boards, Systems, and Chassis. Which of the following statements are correct? (Select ALL that apply).

A. Can monitor up to 50 servers based on Intel?Server Boards, Systems, or Chassis.

B. Allows setting of power capping policies, using Intel?Node Manager.

C. Enables automated software patch deployment.

D. Enables hardware and software inventory management.

E. Enables email alerting for critical server issues.

Correct Answer: BE

**QUESTION 2**

Your customer is setting up their R1208WTTGS system so that remote access via the BMC can be enabled in the event that they need you the Intel Server Specialist to perform remote reporting or diagnostics. They want the KVM sessions to be encrypted for protection and want to know what encryption is available. How would you answer this question?

A. Stunnel, RC4 and AES

B. STH is the encryption available

C. Vtunnel and RC12

D. AES, Vtunnel and RC12

Correct Answer: A

**QUESTION 3**

Your customer calls you with an initial order for 25 servers with more to follow if the configuration, setup, installation and customer experience is flawless. In talking further you discover that their customer is looking for validated third party components for their Intel Server Products. Where would you advise your customer to find this information from the below list? (Select ALL that apply).

A. Hardware compatibility List

B. Tested Hardware and Operating System List

C. Configuration Guide

D. Technical Product Specification

E. Sever Configurator Tool

F. Quick Start User Guide

Correct Answer: BE

---

**QUESTION 4**

Which of the following reflects the correct statement for the image below?

A. This SYSCFG command "Reset BMC" is used to "reboot" the BMC. This command can be useful where changes to BMC settings have been made.

B. This SYSCFG command "Reinitialize BMC" forces the BMC to rescan all available sensors. This command can be used to force the BMC to rescan all sensors when a FRU update has been applied.

C. This SYSCFG command "Restore BMC" restores the BMC settings to default. It can be used to reset the management settings to support reconfiguration of management without carrying over previous management settings.

D. This DOS command allows a super user to restore the file system within the BMC, following a reformat.

Correct Answer: A

---

**QUESTION 5**

Which of the following are features of the Multi-Server Cloning option in the Intel Deployment Assistant? (Select ALL that apply).

A. The servers must be connected via Ethernet cable to the management NIC.

B. The BIOS and BMC settings cannot be cloned.

C. The bootable image can be distributed via bootable USB key or across the network via a PXE server.

D. Cloning is supported between any Intel dual socket server.

E. Some parameters that should be unique with different servers can be modified.

Correct Answer: CE
