QUESTION 1

Karen, a network administrator, has made changes to the DHCP leasing setup for a given network and is expecting all devices to recognize the changes shortly. However, after a full week, none of the machines on the company network are grabbing new addresses with the new lease time. Which of the following is the problem?

- A. The lease time on the original configuration was too long.
- B. The firewall was never configured to recognize the changes.
- C. The DHCP server was never restarted, so changes never took effect.
- D. The lease time on the original configuration was too short.

Correct Answer: A

QUESTION 2

Which of the following ports would have to be allowed through a firewall for NTP to pass on its default port?

- A. 123
- B. 143
- C. 153
- D. 163

Correct Answer: A

QUESTION 3

Zach, the network administrator, has just finished installing a new 10/100/1000 switch, but receives reports from the server administrator that servers connected to the new switch seem to be experiencing slow LAN connections. Zach checks the port connecting the new switch to the core switch and sees the following information: `#show run interface GigabitEthernet0/10 Switchport trunk encapsulation dot1q Switchport mode trunk Switchport trunk native VLAN 10` Which of the following is the MOST likely cause of the slow connections?

- A. The servers have not had VLAN tagging enabled on their NICs.
- B. Speed and duplex have not been set.
- C. VLAN tagging was not set on the trunk.
- D. The servers have been connected with CAT5 cable.

Correct Answer: B

QUESTION 4
