QUESTION 1

You are designing a data center security solution for a customer. The customer asks that you provide a DDoS solution. Several IPsec tunnels will be terminated at the data center gateway.

Which type of security is your customer asking you to implement?

- A. segmentation
- B. intra-data center policy enforcement
- C. perimeter protection
- D. compliance

Correct Answer: C

QUESTION 2

You are asked to provide a design proposal for a campus network. As part of the design, the customer requires that all end user devices must be authenticated before being granted access to their Layer 2 network.

Which feature meets this requirement?

- A. IPsec
- B. 802.1X
- C. NAT
- D. ALGs

Correct Answer: B

QUESTION 3

You are responding to an RFP for securing a large enterprise. The RFP requires an onsite security solution which can use logs from third-party sources to prevent threats. The solution should also have the capability to detect and stop zero-day attacks.

Which Juniper Networks solution satisfies this requirement?

- A. IDP
- B. Sky ATP
- C. JSA

D. JATP

Correct Answer: D
