### QUESTION 1

A hosting company is migrating to cloud-based solutions. Their customers share a physical firewall cluster, subdivided into individual logical firewalls for each customer. Projection data shows that the cloud service will soon deplete all the resources within the physical firewall. As a consultant, you must propose a scalable solution that continues to protect all the cloud customers while still securing the existing physical network.

In this scenario, which solution would you propose?

- A. Deploy a vSRX cluster in front of each customer's servers while keeping the physical firewall cluster
- B. Deploy a software-defined networking solution
- C. Remove the physical firewall cluster and deploy vSRX clusters dedicated to each customer's servers
- D. Replace the physical firewall cluster with a higher-performance firewall

Correct Answer: C

---

### QUESTION 2

What are two benefits of the vSRX in a virtualized private or public cloud multitenant environment? (Choose two.)

- A. full logical systems capabilities
- B. stateful firewall protection at the tenant edge
- C. 100GbE interface support
- D. OSPFv3 capabilities

Correct Answer: AB

---

### QUESTION 3

You are designing a new campus Internet access service that implements dynamic NAT for customer IP addressing. The customer requires services that allow peer-to-peer networking and online gaming.

In this scenario, what will accomplish this task?

- A. EVPN over IPsec
- B. one-to-one NAT
- C. stacked VLAN tagging
- D. endpoint independent mapping

Correct Answer: C

---

#### QUESTION 4

You have a campus location with multiple WAN links. You want to specify the primary link used for your VoIP traffic.

In this scenario, which type of WAN load balancing would you use?

- A. BGP
- B. OSPF
- C. FBF
- D. ECMP

Correct Answer: C

---

#### QUESTION 5

You are designing a data center interconnect between two sites across a service provider Layer 2 leased line. The sites require Layer 2 connectivity between hosts, and the connection must be secure.

In this scenario, what will accomplish this task?

- A. IRB VLAN routing
- B. MACsec encryption
- C. EVPN over IPsec
- D. IPsec encryption

Correct Answer: B
