### QUESTION 1

In a data center, what are two characteristics of access tier VLAN termination on the aggregation tier? (Choose two.)

- A. Multiple VLANs can be part of one security zone
- B. A security zone is limited to a single VLAN
- C. Inter-VLAN traffic within a zone can bypass firewall services
- D. Inter-VLAN traffic is secured through firewall services

Correct Answer: AD

---

### QUESTION 2

A hosting company is migrating to cloud-based solutions. Their customers share a physical firewall cluster, subdivided into individual logical firewalls for each customer. Projection data shows that the cloud service will soon deplete all the resources within the physical firewall. As a consultant, you must propose a scalable solution that continues to protect all the cloud customers while still securing the existing physical network.

In this scenario, which solution would you propose?

- A. Deploy a vSRX cluster in front of each customer's servers while keeping the physical firewall cluster
- B. Deploy a software-defined networking solution
- C. Remove the physical firewall cluster and deploy vSRX clusters dedicated to each customer's servers
- D. Replace the physical firewall cluster with a higher-performance firewall

Correct Answer: C

---

### QUESTION 3

You have a site that has two Internet connections but no switch on the outside of the firewall. You want to use ISP-A over ISP-B during normal operations.

Which type of chassis cluster design would you propose to satisfy this requirement?

- A. Propose active/active cluster deployment with separate redundancy groups
- B. Propose active/passive cluster deployment with separate redundancy groups
- C. Propose active/active cluster deployment without separate redundancy groups
- D. Propose active/passive cluster deployment without separate redundancy groups

Correct Answer: A

#### QUESTION 4

You are asked to include anti-malware features into an existing network design. Traffic from the infected machines must be moved to a quarantined VLAN.

Which product will provide this segregation?

- A. screens
- B. Sky ATP
- C. unified threat management
- D. Software Defined Secure Network

Correct Answer: B

---

#### QUESTION 5

You are deploying Security Director with the logging and reporting functionality for VMs that use SSDs. You expect to have approximately 20,000 events per second of logging in your network.

In this scenario, what is the minimum number of logging and reporting devices that should be used?

- A. 2
- B. 4
- C. 1
- D. 3

Correct Answer: C
