### QUESTION 1

You are designing a new SDN WAN solution for a large enterprise MPLS backbone. The existing customer network has some LSPs in place that were manually provisioned. The customer requires that the solution provide for complete LSP life cycle management. You are considering the NorthStar Controller as part of the design. Which two LSP types would be managed in this scenario? (Choose two)

- A. PCC administered
- B. PCE administered
- C. PCE controlled
- D. PCE delegated

Correct Answer: AC

### QUESTION 2

Exhibit: Within ISP E, R1 is load-balancing traffic destined to ISP D over the R1-R2-R5 and R1-R4-R5 paths. At some point, a link degradation event occurs in the network as shown in the exhibit. You want R1 to rapidly learn of the path failure.

- A. Adjust the OSPF hello timer to a subsecond value between R1 and R4.
- B. Enable Bidirectional Forwarding Detection between R1 and R4.
- C. Enable Bidirectional Forwarding Detection between R4 and R5.
- D. Adjust the OSPF hello timer to a subsecond value between R4 and R5.

Correct Answer: C

---

### QUESTION 3

Your customer is paying for traffic prioritization and you must ensure that all traffic from their 172.27.

10.0/24 network receives top priority through your network.

Which action will satisfy this requirement?

- A. Apply a behavior aggregate classifier to the egress interface.
- B. Apply a custom rewrite rule to the ingress interface.
- C. Apply a multifield classifier to the ingress interfaces.
- D. Apply a custom scheduler map to the ingress interface.

Correct Answer: C

We would need MF to match the address and set the forwarding class.

---

### QUESTION 4

You are asked to provide a proposal for a service provider's OSPF network. The customer is concerned about the volume of link-state advertisements within their network and want to limit this traffic. Given this scenario which design component would satisfy the customer's requirement?

- A. Use the same AS number.
- B. Use multiple areas.
- C. Use multiple levels.
- D. Use the same router IDs.

Correct Answer: B

---

### QUESTION 5

You are asked to design a DDoS prevention system to help mitigate denial-of-service attacks that target your customers. The management group wants to know the effect FlowSpec may have on current network operations if it is implemented as a solution. In this scenario which two statements are correct? (Choose two )

- A. FlowSpec can block traffic based on stateful flow information.
- B. FlowSpec can block traffic based on the source address.
- C. FlowSpec requires Jflow implementation and licensing.
- D. FlowSpec can block traffic based on the destination address.

Correct Answer: BD
