QUESTION 1

You have recently configured an IPsec tunnel between two SRX Series devices. One of the devices is assigned an IP address using DHCP with an IP address that changes frequently. Initial testing indicates that the IPsec tunnel is not working. Troubleshooting has revealed that Phase 1 negotiations are failing.

Which two actions would solve the problem? (Choose two.)

- A. Verify that the device with the IP address assigned by DHCP is the traffic initiator.
- B. Verify that VPN monitoring is enabled.
- C. Verify that the IKE policy is configured for aggressive mode.
- D. Verify that PKI is properly configured.

Correct Answer: AC

QUESTION 2

Which two modes are supported during the Phase 1 IKE negotiations used to establish an IPsec tunnel? (Choose two.)

- A. transport mode
- B. aggressive mode
- C. main mode
- D. tunnel mode

Correct Answer: BC

QUESTION 3

Click the Exhibit button.

```
[edit]
user@host# show security policies
from-zone red to-zone blue {
    policy deny-http {
        match {
            source-address any;
            destination-address any;
            application junos-https;
        }
        then {
            deny;
        }
    }
}
from-zone red to-zone blue{
    policy default-permit {
        match {
            source-address any;
            destination-address any;
            application any;
        }
        then {
            permit;
        }
    }
}

[edit]
user@host# run show security flow status
Flow forwarding mode:
Inet forwarding mode: packet based (reboot needed to change to flow based)
Inet6 forwarding mode: drop
MPLS forwarding mode: drop
ISO forwarding mode: drop
Flow trace status
Flow tracing status: off
Flow session distribution
Distribution mode: RR-based
Flow ipsec performance acceleration: off
Flow packet ordering
Ordering mode: Hardware
```

You notice that your SRX Series device is not blocking HTTP traffic as expected. Referring to the exhibit, what should you do to solve the problem?

- A. Commit the configuration.
- B. Reboot the SRX Series device.
- C. Configure the SRX Series device to operate in packet-based mode.
- D. Move the deny-http policy to the bottom of the policy list.

Correct Answer: B

QUESTION 4

Which SRX5400 component is responsible for performing first pass security policy inspection?

- A. Routing Engine
- B. Switch Control Board
- C. Services Processing Unit
- D. Modular Port Concentrator

Correct Answer: C

QUESTION 5

You are asked to support source NAT for an application that requires that its original source port not be changed.

Which configuration would satisfy the requirement?

- A. Configure a source NAT rule that references an IP address pool with interface proxy ARP enabled.
- B. Configure the egress interface to source NAT fixed-port status.
- C. Configure a source NAT rule that references an IP address pool with the port no-translation parameter enabled.
- D. Configure a source NAT rule that sets the egress interface to the overload status.

Correct Answer: C
