QUESTION 1

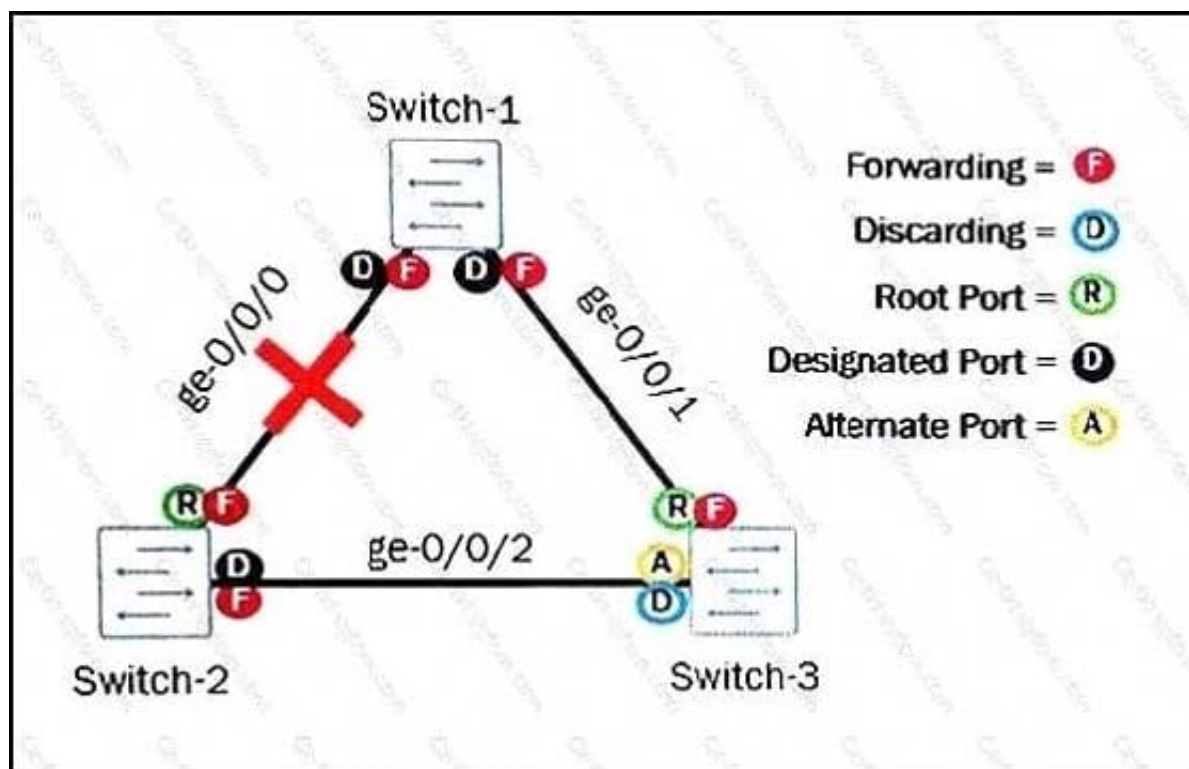

What is considered a requirement for passing traffic through GRE tunnels?

- A. Tunnel endpoints must have static routes pointing to the remote endpoints.
- B. You must configure the tunnel on the physical interface connecting to the remote endpoint.
- C. You must be able to reach the remote endpoint through the tunnel.
- D. Tunnel endpoints must have a route that directs traffic into the tunnel.

Correct Answer: C

QUESTION 2

Click the Exhibit button.

You manage the Layer 2 network shown in the exhibit. You experience a failure on the ge-0/0/0 link between Switch-1 and Switch-2.

Which statement is correct about the expected behavior?

- A. Switch-3's ge-0/0/2 port role and state will transition to designated and forwarding.
- B. Switch-3's ge-0/0/2 port role and state will remain as alternate and discarding.

- C. Switch-3 will become the root bridge for the RSTP topology.
- D. Switch-3 will remove the ge-0/0/2 interface from the RSTP topology.

Correct Answer: A

QUESTION 3

Which statement is true about load balancing of equal cost paths?

- A. A load-balancing policy must be configured under the policy-options hierarchy.
- B. The route preference parameter must be manually set to the same value.
- C. The maximum-paths parameter must be configured under the routing-options hierarchy.
- D. Traffic is balanced across equal cost paths by default.

Correct Answer: D

QUESTION 4

Which two sequence correctly describe the correct processing order of firewall filters on an EX Series switch? (Choose two.)

- A. port filter > VLAN filter > router filter > transmit packet
- B. router filter > VLAN filter > port filter > transmit packet
- C. receive packet > port filter > VLAN filter > router filter
- D. receive packet > router filter > VLAN filter > port filter

Correct Answer: BC

The order in which filters are applied depends on the direction in which they are applied, as indicated here:

B: Egress filters (outbound traffic leaving the device or interface): C: Ingress filters (inbound traffic to the device or interface):

QUESTION 5

Which two statements are correct about aggregate routes in the Junos OS? (Choose two.)

- A. An active route can contribute only to a single aggregate route.
- B. Only one aggregate route can be configured for each destination prefix.
- C. An aggregate route has a default next hop of an IP address.
- D. An aggregate route always shows as active in the routing table.

Correct Answer: AB

A route can contribute only to a single aggregate route. You can configure only one aggregate route for each destination prefix.
