### QUESTION 1

Your network includes SRX Series devices at the headquarters location. The SRX Series devices at this location are part of a high availability chassis cluster and are expected to support several UTM features.

Which two statements related to this environment are true? (Choose two.)

- A. UTM features can be configured on either of the nodes within the cluster.
- B. The chassis cluster must be configured for active/active mode.
- C. UTM features must be configured on the primary node within the cluster.
- D. The chassis cluster must be configured for active/backup mode.

Correct Answer: AD

---

### QUESTION 2

You have implemented APBR on your SRX Series device and are verifying that your changes are working properly. You notice that when you start the application for the first time, it does not follow the expected path.

What are two reasons that would cause this behavior? (Choose two.)

- A. The application system cache does not have an entry for the first session.
- B. The application system cache has been disabled.
- C. The application system cache already has an entry for this application.
- D. The advanced policy-based routing is applied to the ingress zone and must be moved to the egress zone.

Correct Answer: AB

---

### QUESTION 3

Click the Exhibit button.

```
user@host > show services user-identification authentication-table
authentication-source active-directory
Domain: example
Total entries: 1
Source IP      Username      groups (Ref by policy)  state
192.168.50.8   user1         grpl                    Initial
```

Which statement explains the current state value of the command output shown in the exhibit?

- A. A valid response was received from a domain PC probe, and the user is a valid domain user programmed in the PFE.

- B. An invalid response was received from a domain PC probe, and the user is an invalid domain user.
- C. A probe event generated an entry in the authentication table, but no probe response has been received from the domain PC.
- D. The user-to-address mapping was successfully read from the domain controller event logs, and an entry was added to the authentication table which currently resides on the Routing Engine.

Correct Answer: A

---

#### QUESTION 4

Which feature of Sky ATP is deployed with Software-Defined Secure Networks?

- A. zero-day threat mitigation
- B. software image snapshot support
- C. device inventory management
- D. service redundancy daemon configuration support

Correct Answer: A

---

#### QUESTION 5

Your manager has noticed a drop in productivity and believes it is due to employees checking their social media feeds too frequently. You are asked to provide analytical statistics for this traffic within your network on an hourly basis.

Which AppSecure feature should be used to collect this information?

- A. AppQoS
- B. AppFW
- C. AppTrack
- D. APBR

Correct Answer: C
