### QUESTION 1

You have configured three logical tunnel interfaces in a tenant system on an SRX1500 device. When committing the configuration, the commit fails.

In this scenario, what would cause this problem?

- A. There is no GRE tunnel between the tenant system and master system allowing SSH traffic
- B. There is no VPLS switch on the tenant system containing a peer It-0/0/0 interface
- C. The SRX1500 device does not support more than two logical interfaces per tenant system
- D. The SRX1500 device requires a tunnel PIC to allow for logical tunnel interfaces

Correct Answer: B

Reference: [https://www.juniper.net/documentation/en\\_US/junos/topics/topic-map/logical-systemsoverview.html](https://www.juniper.net/documentation/en_US/junos/topics/topic-map/logical-systemsoverview.html)

---

### QUESTION 2

You are asked to configure a new SRX Series CPE device at a remote office. The device must participate in forwarding MPLS and IPsec traffic.

Which two statements are true regarding this implementation? (Choose two.)

- A. Host inbound traffic must not be processed by the flow module
- B. Host inbound traffic must be processed by the flow module
- C. The SRX Series device can process both MPLS and IPsec with default traffic handling
- D. A firewall filter must be configured to enable packet mode forwarding

Correct Answer: AD

Reference: [https://www.juniper.net/documentation/en\\_US/junos/topics/topic-map/security-packet-basedforwarding.html](https://www.juniper.net/documentation/en_US/junos/topics/topic-map/security-packet-basedforwarding.html)

### QUESTION 3

Click the Exhibit button.

```
user@host> show ethernet-switching global-information
Global Configuration:
```

```
MAC aging interval           : 300
MAC learning                 : Enabled
MAC statistics               : Disabled
MAC limit Count              : 65535
MAC limit hit                : Disabled
MAC packet action drop      : Disabled
LE aging time                : 1200
LE VLAN aging time          : 1200
Global Mode                  : Switching
```

Referring to the exhibit, which two statements are true? (Choose two.)

- A. You can secure intra-VLAN traffic with a security policy on this device
- B. You can secure inter-VLAN traffic with a security policy on this device
- C. The device can pass Layer 2 and Layer 3 traffic at the same time
- D. The device cannot pass Layer 2 and Layer 3 traffic at the same time

Correct Answer: AD

Reference: [https://www.juniper.net/documentation/en\\_US/junos/topics/topic-map/ethernet-port-switchingmodes.html](https://www.juniper.net/documentation/en_US/junos/topics/topic-map/ethernet-port-switchingmodes.html)

---

#### QUESTION 4

You are asked to look at a configuration that is designed to take all traffic with a specific source ip address and forward the traffic to a traffic analysis server for further evaluation. The configuration is no longer working as intended.

```
[edit]
user@srx# show
...
interfaces {
  xe-0/0/1 {
    description "Connected to Finance";
    unit 0 {
      family inet {
        address 10.1.1.1/24;
      }
    }
  }
  xe-0/1/0 {
    description "Connected to Internet";
    unit 0 {
      family inet {
        address 192.168.2.2/30;
      }
    }
  }
  xe-0/2/1 {
    description "Connected to Sales";
    unit 0 {
      family inet {
        address 10.3.2.21/24;
      }
    }
  }
}
firewall {
  filter filter1 {
    term t1 {
      from {
        source-address {
          10.1.1.3/32;
        }
      }
      then {
        next-interface {
          xe-0/1/0.0;
          routing-instance evall;
        }
      }
    }
    term t2 {
      then {
        routing-instance default;
      }
    }
  }
}
routing-instances {
  evall {
    instance-type virtual-router;
    interface xe-0/1/0.0;
  }
}
```

Referring to the exhibit which change must be made to correct the configuration?

- A. Apply the filter as in input filter on interface xe-0/2/1.0
- B. Apply the filter as in input filter on interface xe-0/0/1.0
- C. Create a routing instance named default
- D. Apply the filter as in output filter on interface xe-0/1/0.0

Correct Answer: B

---

#### QUESTION 5

Which two modes are supported on Juniper Sky ATP? (Choose two.)

- A. private mode
- B. global mode
- C. tap mode
- D. secure wire mode

Correct Answer: CD
