- A. This packet is part of an existing session.
- B. The SRX device is changing the source address on this packet from
- C. This is the first packet in the session
- D. The SRX device is changing the destination address on this packet 10.0.1.1 to 172.20.101.10.

Correct Answer: CD

QUESTION 2

Exhibit

    family inet {
        filter {
            input my-filter;

        address 172.25.1.1/24;
    }
}

        }
    }
}

[edit]
user@srx# show routing-options

}
rib-groups {
    my-rib-group {
        import-rib [ inet.0 ISP-1.inet.0 ];
    }
}
```

You are implementing filter-based forwarding to send traffic from the 172.25.0.0/24 network through ISP-1 while sending all other traffic through your connection to ISP-2. Your ge- 0/0/1 interface connects to two networks, including the 172.25.0.0/24 network. You have implemented the configuration shown in the exhibit. The traffic from the 172.25.0.0/24 network is being forwarded as expected to 172.20.0.2, however traffic from the other network (172.25.1.0/24) is not being forwarded to the upstream 172.21.0.2 neighbor.

In this scenario, which action will solve this problem?

- A. You must specify that the 172.25.1.1/24 IP address is the primary address on the ge- 0/0/1 interface.
- B. You must apply the firewall filter to the lo0 interface when using filter-based forwarding.

- C. You must add another term to the firewall filter to accept the traffic from the 172.25.1.0/24 network.
- D. You must create the static default route to neighbor 172.21 0.2 under the ISP-1 routing instance hierarchy.

Correct Answer: D

You are using traceoptions to verify NAT session information on your SRX Series device. Referring to the exhibit, which two statements are correct? (Choose two.)

- A. This is the last packet in the session.
- B. The SRX Series device is performing both source and destination NAT on this session.
- C. This is the first packet in the session.
- D. The SRX Series device is performing only source NAT on this session.

Correct Answer: AB

Which two statements are correct about the output shown in the exhibit? (Choose two.)

- A. The packet is processed as host inbound traffic.
- B. The packet matches the default security policy.
- C. The packet matches a configured security policy.
- D. The packet is processed in the first path packet flow.

Correct Answer: AB
