QUESTION 1

Which of the following commands will print the inode usage on each mounted filesystem?

- A. du -i
- B. df -i
- C. lsfs -i
- D. printfs -i

Correct Answer: B

QUESTION 2

USB fax/modems that conform to this subclass of the Communication Device Class (CDC) vendor neutral standard are Linux compatible (answer is a 3 letter acronym)

- A. acm

Correct Answer: A

QUESTION 3

You are formatting a single hard disk for a Linux install. What is the maximum number of primary partitions you can create?

- A. four

Correct Answer: A

QUESTION 4

Which of the following is very important when installing from source code (Check TWO that apply)?

- A. Read all documentation included with the source code.
- B. Reboot after installing all programs.
- C. Manually check to see if all dependencies are met.
- D. Use rpm or dpkg go verify the installation.

E. Do not install binaries as the root user.

Correct Answer: AC

QUESTION 5

You have a text file with tab-separated values, but your application needs them space-separated. What command would you use from the Bash shell to achieve this? Please fill in the command only, without any options.

A. expand

Correct Answer: A

The expand command is used to convert from tab to space. Example: `expand -t 2 test a`. It will convert the tab into two spaces.
