QUESTION 1

An analyst needs to display data from two different sources together. There is a Look for each data source, but there is no shared field that can be combined. Both Looks are saved in the Shared folder.

How should the analyst display the data from both sources?

- A. use Merged Results to combine the data sources.
- B. Ask the LookML developer to build a new Explore.
- C. Add both Looks to a dashboard
- D. Pin both Looks to a board.

Correct Answer: C

QUESTION 2

An analyst creates a dashboard that shows sales at an aggregate and then an individual level. This dashboard is slow to run, and the analyst sees a warning about how load times may be impacted in dashboards with more than 25 tiles.

What should the analyst create to make sure all data sources in this dashboard are connected but still load quickly?

- A. Dashboard filter to specify which individual data shows
- B. Two dashboards, one with aggregate and one with individual data
- C. Two dashboards with a text tile to hyperlink from one dashboard to the other
- D. Folder with all dashboard tiles for aggregate data and individual data.

Correct Answer: A

QUESTION 3

A business analyst is creating an Explore that shows the number of hotel rooms booked per week, by room type. The analyst is using a Week dimension and a Count measure, and is provisioning on a Room Type dimension. Looking at the results, the Count of King rooms seems unusually low one week.

What should the analyst do to further investigate the low numbers?

- A. Run the Explore again to make sure the results are the same.
- B. Click on the Count measure where it is low to drill in to it.
- C. Click on the Room Type dimension where it is King to drill in to it.
- D. Remove the pivot on the Room Type dimension and re-run the Explore.

Correct Answer: B

QUESTION 4

The sales team has all its Looker content stored in a folder called Sales. Team members are complaining that the Looks and dashboards have been getting moved and edited in unwanted ways. Only the sales analyst should be editing the content in the Sales folder.

Which access settings should be applied to the folder?

- A. Admins: Manage Access, Edit Sales analyst: Edit Sales group: View
- B. Admins: View Sales analyst: Edit Sales group: View
- C. Admins: View Sales analyst: Manage Access, Edit Sales group: View
- D. Admins: Manage Access, Edit Sales analyst: Manage Access, Edit Sales group: View

Correct Answer: A

QUESTION 5

An analyst pins a dashboard from a personal folder to the team board. Other colleagues report that they cannot access the dashboard. There are a few dashboards in the personal folder that are not ready to share yet.

What should the analyst do to enable the team's access?

- A. Give all users view access to the personal folder.
- B. Move the dashboard to a shared folder and provide access only to the users from the team.
- C. Give view access to the individual dashboards.
- D. Create a subfolder in the personal folder and given view access to the users from the team.

Correct Answer: D
