QUESTION 1

In which of the following ways does Dynamic App Containment protect against malware?

- A. It checks for spyware, unwanted programs, and viruses based on known patterns.
- B. It monitors communication between the computer and the network.
- C. It detects malicious files and activities using machine-learning techniques.
- D. It limits the actions unknown applications can take on the end system.

Correct Answer: C

QUESTION 2

An administrator wants to see more details about recent activity on an endpoint than what is shown in the ENS console. In which of the following locations can the administrator view the log files?

- A. %ProgramFiles%\McAfee\Logs
- B. %ProgramFiles%\McAfee\Endpoint Security\Logs
- C. %ProgramData%\McAfee\Endpoint Security\Logs
- D. %ProgramData%\McAfee\Logs

Correct Answer: C

QUESTION 3

In which of the following ways would ATP determine the reputation information if Adaptive Threat Protection (ATP) is deployed and neither a TIE server nor an Internet connection is available?

- A. ATP will use information from the local system.
- B. ATP will query other systems in the environment.
- C. ATP will do nothing and auto-disable itself.
- D. ATP will prompt the user for manual input.

Correct Answer: B

QUESTION 4

After installing ENS on a server, the server administrator finds that a specific application runs very slow, yet communication flows are still present. Which of the following remediation steps should the administrator take?

- A. Remove an exclusion.
- B. Create a whitelist.
- C. Create an exclusion.
- D. Remove a whitelist.

Correct Answer: C

QUESTION 5

The security team has requested that adaptive threat protection be integrated with a TIE server. Which of the following is required?

- A. Data Exchange Layer
- B. Advanced Threat Defense
- C. Event Security Manager
- D. Active Response

Correct Answer: A
