QUESTION 1

In a code review of a merchant's site you have discovered that there are multiple observers for the checkout_submit_all_after event. After closer inspection, you notice one of these observers is relying on the others being executed before it is called.

What risk does this pose, and how can it be mitigated?

- A. There is no risk posed as long as each event observer specifies a correct sortOrder. Nothing needs to be changed.
- B. Event observers are fired in alphabetical order of the observer name. There is no risk here.
- C. Magento only supports one observer per event. These observers will need to be combined into a single point of customization.
- D. Order of listener execution cannot be guaranteed, resulting in a fragile implementation. This code should be re-worked using plugins

Correct Answer: B

QUESTION 2

You are developing a new theme which inherits from the Magento_Luma theme. How is this accomplished?

- A. Add Magento/luma to theme.xml
- B. Run the CLI command bin/magento dev:theme:inherit Magento_Luma
- C. Specify the parent theme in Magento admin > Design > Configuration
- D. Add Magento/luma to etc/view.xml

Correct Answer: A

QUESTION 3

A module you are working on needs to send a newsletter to all subscribed customers at predefined intervals.

Which two actions do you take to make sure the newsletter is sent? (Choose two.)

- A. Implement \MyCompany\MyModule\Cron\NewsLetterSender::execute and register it in etc/crontab/di.xml
- B. Implement \MyCompany\MyModule\Cron\NewsLetterSender::execute and register it in etc/crontab.xml
- C. Make sure bin/magento cron:run is added to the system crontab

D. Register the plugin for \Magento\Customer\Model\Customer::authenticate in etc/crontab.xml

Correct Answer: BC

QUESTION 4

You are working on a project that contains a million SKUs. The merchant has requested the product view page to have a custom color schema and page layout depending on the product price range.

How do you implement this, keeping simplicity in mind?

- A. Create a custom block which will dynamically choose the appropriate template
- B. Specify custom layout update XML in the admin panel for every product
- C. Write a Data Patch which will set the appropriate layout update XML for every product record
- D. Enable the dynamic product page UI component and configure it to use a different layout per price range

Correct Answer: D

QUESTION 5

Where do you change the frontName for the admin router?

- A. app/etc/config.xml
- B. app/etc/env.php
- C. app/etc/local.xml
- D. composer.json

Correct Answer: B
