QUESTION 1

You are a Dynamics 365 for Customer Service system administrator. You have a production instance named Organization1 that is integrated with an ERP system. When a new account is created in the ERP system, an account is created in Organization1 and with the ERP Account field set to Yes.

When the field value is set, an account must be created in a separate production instance named Organization2.

You need to use Microsoft Flow to create the account.

How should you configure the flow? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

The screenshot shows a Microsoft Flow configuration interface. The flow starts with a trigger 'When a record is created' with two dropdown menus for 'Organization Name' and 'Entity Name', both set to 'Organization1' and 'Accounts'. This is followed by a 'Condition' step: 'When a record is created > ERP Account' is equal to 'Yes'. If the condition is 'If yes', it leads to an action 'Create a new record' with 'Organization Name' and 'Entity Name' set to 'Organization2' and 'Accounts'. If the condition is 'If no', there is an 'Add an action' button. A large red watermark 'PassApply.com' is overlaid on the image.

Correct Answer:

Answer Area

When a record is created

* Organization Name

Organization1
Organization2
Accounts

* Entity Name

Organization1
Organization2
Accounts

Condition

When a record is created > ERP Account is equal to Yes

Create a new record > ERP Account

If yes

Create a new record

* Organization Name

Organization1
Organization2
Accounts

* Entity Name

Organization1
Organization2
Accounts

If no

Add an action

QUESTION 2

You are a Dynamics 365 Customer Service system administrator.

You need to reduce the database size and reduce the rate at which the size of the audit log increases.

What should you do?

- A. Back up the production instance and restore to a Sandbox instance. Delete the audit log.
- B. Turn auditing features off for entities or fields that are not needed.
- C. Delete the current audit log.
- D. Replicate the database to Microsoft Azure SQL.

Correct Answer: B

QUESTION 3

You are a Dynamics 365 for Customer Service system administrator.

Compliance standards require that entities and fields with Auditing set to On are recorded. You have configured all settings to the default settings and have set Global Auditing to On.

You need to verify compliance standards.

Which data items will be included in the audit log?

- A. Microsoft Office 365 activities
- B. all entities and fields
- C. entities and fields with auditing enabled
- D. user access information only

Correct Answer: C

QUESTION 4

You are a Dynamics 365 for Customer Service developer.

You need to create a report that shows annual customer growth from 2012-2018. The report must be printable and must include company branding.

Which reporting options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Option
Can be printed	<div><div></div><div>Report Wizard</div><div>System View</div><div>Dashboard</div></div>
Include company branding	<div><div></div><div>Fetch-based Reporting Services</div><div>Chart</div><div>Personal</div></div>

Correct Answer:

Answer Area

Requirement	Option
Can be printed	<div>Report Wizard</div> <div>System View</div> <div>Dashboard</div>
Include company branding	<div>Fetch-based Reporting Services</div> <div>Chart</div> <div>Personal</div>

QUESTION 5

You are a Dynamics 365 help desk administrator.

You need to create a dashboard that displays information on help desk cases that are handled each week.

Which dashboard components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
