QUESTION 1

DRAG DROP

You sign in to Lifecycle Services (LCS).

You need to restart the Internet Information Service (IIS) service in a nonproduction Tier 2 environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Select **Maintain** and then select **Restart services**.
Enter the command **iisreset /restart**.
Select the appropriate environment.
Navigate to the Environment Details page.
Navigate to the System Administration parameters page.
Remotely connect to the server that hosts the Dynamics 365 IIS service.

Answer Area

Correct Answer:

Actions

Enter the command **iisreset /restart**.

Navigate to the System Administration parameters page.

Remotely connect to the server that hosts the Dynamics 365 IIS service.

Answer Area

Select the appropriate environment.

Navigate to the Environment Details page.

Select **Maintain** and then select **Restart** services.

QUESTION 3

You are implementing Dynamics 365 Supply Chain Management.

New sales orders must be evaluated every hour. Warehouse operations managers must be sent an email alert to include new sales orders. The solution must not include custom code development.

You need to use a Power Platform product to implement the solution.

Which product should you use?

A. Power Apps

B. Power BI

C. Power Virtual Agents

D. Power Automate

Correct Answer: B

QUESTION 4

You are configuring Dynamics 365 Finance to make sure that the typical secure SMTP settings are used for sending email.

You make sure that In-place hold and Litigation hold are enabled.

Does this action ensure that secure SMTP settings are used?

A. Yes, it does

B. No, it does not

Correct Answer: B

QUESTION 5

DRAG DROP

You are a Dynamics 365 Finance implementation consultant.

You plan to use automated regression testing in a company\\'s environment, as the system will be updated frequently until automatic updates can be applied.

You need to identify when and what key business object should be used during the implementation.

Which business objects should you use? To answer, drag the appropriate objects to the correct component actions. Each object may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Objects	Component Actions	Object
Test scripts	Generate from the analysis meetings	
Business requirements	Use for regression testing	
	Generate use cases	
	Use in a gap analysis process	

Correct Answer:

Answer Area

Objects	Component Actions	Object
Test scripts	Generate from the analysis meetings	Test scripts
Business requirements	Use for regression testing	Test scripts
	Generate use cases	Business requirements
	Use in a gap analysis process	Business requirements
