QUESTION 1

A manufacturing company uses time and attendance in Dynamics 365 Supply Chain Management.

The company requires that employees register time against each machine on the shop floor.

You need to configure the system so that employees can register time.

Which two configurations must be set up? Each answer represents a partial solution.

NOTE: Each correct selection is worth one point.

- A. electronic timecard parameter
- B. registration workflow
- C. machines as a resource
- D. time registration workers

Correct Answer: CD

QUESTION 2

A company configures master planning to order large and expensive aluminum sheets that are only available at certain times of the year.

The warehouse manager reports that replenishment levels are too high, causing inventory value to be over budget. In addition, the aluminum sheets take up too much space on the shop floor.

You need to configure the appropriate replenishment method.

Which coverage dimension should you use?

- A. Min/Max
- B. Per period
- C. Per requirement
- D. Manual

Correct Answer: B

Period ?The replenishment method combines all the demand for a period into one order for the product. The order will be planned for the first day of the period, and its quantity will fulfill the net requirements during the established period. The period starts with the first demand of the product and covers the defined length of time. The next period will start with the next requirements of the product. The Period coverage code is often used for non-predictable inventory draw, season-influenced products, or high-cost products.

Incorrect:

*

Min./Max. ?The replenishment method is based on the inventory level. It defines the replenishment of inventory up to a specific level when the predicted on-hand level is below a specific threshold. The replenishment quantity will be the

difference between the maximum level and the predicted on-hand level. The Min./Max. coverage code is often used for predictable inventory draw, high runners, or less expensive products.

*

Manual ?In the replenishment method, the system doesn't suggest purchase, transfer, or production orders for the product. Instead, the planner for the product is responsible for creating the required orders for the replenishment of the product. The Manual coverage code is often used for products that system-generated planned orders aren't wanted for.

*

Requirement ?In the replenishment method, the system creates a planned purchase, transfer, or production order per requirement for the product. This method is used for expensive products that have intermittent demand. The Requirement

coverage code is often used for configurable products or make-to-order scenarios.

QUESTION 3

A company that makes artisan chocolate has implemented Dynamics 365 Supply Chain Management.

The top selling chocolate bar for the company must contain 85 percent cocoa. The cocoa can be obtained from either cocoa beans, cocoa butter or a combination of both, depending on supply at the time of production. The top three

substitutions for the cocoa butter ingredient are configured in the system.

When you run master planning, all substitutions are out of stock at the manufacturing plant, but in stock at a secondary warehouse.

You need to process the planned orders.

Which type of planned order would be generated?

- A. Sales order
- B. Transfer order
- C. Purchase order
- D. Production order

Correct Answer: B

You can use warehouse levels to create a hierarchy that supports transfer orders between warehouses. Based on this setup, master scheduling calculates item requirements at the individual warehouse level and generates planned transfer orders from an assigned source warehouse to fulfill them.

QUESTION 4

A company uses Dynamics J65 Supply Chain Management.

The marketing group needs to be able to view a manufacturer's suggested retail price (MSRP) (or a new bill of materials (BOM) item when the cost of the BOM item is calculated.

You need to configure the functionality.

What should you do?

- A. Use the category price rules to generate a trade agreement with the sales price.
- B. Add a profit setting percentage to a cost group.
- C. Add a profit setting percentage to the released BOM product
- D. Set the sales price model field on the calculation group to item sales price.
- E. Add a profit setting percentage to a calculation group.

Correct Answer: E

QUESTION 5

You need to set up the state control for sales of motorcycles.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an inclusive restricted product list for United States. Do not add the motorcycle part to the list.
- B. Create an inclusive restricted product list for United States and add the motorcycle part to the list.
- C. Create an exclusive restricted product list for California and add the motorcycle part to the list.
- D. Create an exclusive restricted product list for Missouri and add the motorcycle part to the list.

Correct Answer: BC
