QUESTION 1

You need to configure the system to track the cost and delivery performance of VendorX. Which two actions should you perform? Each correct answer presents a complete solution.

- A. Create a service product and set Stocked product = No.
- B. Add an activity to the production route for deliveries.
- C. Add an activity to the production flow for deliveries.
- D. Create a service product and set Stocked product = Yes.

Correct Answer: BD

Subcontracting of route operations To use subcontracting of route operations for production or batch orders, the service product that is used for the procurement of the service must be defined as a product of the Service type. Additionally, it must have an item model group that has the Stocked product option under Inventory policy set to Yes. This option defines whether a product is accounted as inventory on product receipt (Stocked product = Yes), or whether the product is expensed on a profit and loss account (Stocked product = No). Although this behavior might seem contradictory, it's based on the fact that only products that have this policy will create inventory transactions that can be used in cost control to calculate planned cost and determine the actual cost when a production order is ended.

QUESTION 4

A company uses engineering change management in Dynamics 365 Supply Chain Management. The Product readiness checks feature is turned off.

An existing engineering product must be reconfigured for a new product readiness policy.

You need to change the product readiness policy.

Where should you make this change?

- A. default order settings
- B. shared product
- C. engineering category
- D. product configuration model
- E. released product

Correct Answer: E

QUESTION 5

A company manufactures high performance bicycles.

The bicycles come in several different preconfigured models. Customers can also purchase custom configurations. Several add-ons are dependent on other accessories in order to be installed. You need to set up the system to handle the

different product configurations.

What should you do?

- A. Create an expression constraint.
- B. Create a phantom BOM.
- C. Create a co-product.
- D. Create a batch version.

Correct Answer: B
