QUESTION 1

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 Finance. You are customizing elements for the extended data types (EDTs) shown in the following table.

```
if ( truckTable.TruckStatus == TruckStatus::Quarantine || truckTable.TruckStatus == TruckStatus::InTransit)
{
    Info("Extended");
}
```

You have a table named WorkCalendar. The table has a column named BasicCalendarID that uses the BasicCalendarID EDT.

You need to increase the length of the column by using an extension.

Solution: Create an extension for CalendarName.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Just extend CalendarName.

Note: There are several properties that can be customized on existing extended data types (EDTs) through extension:

You can only set the new String size to a value equal to or larger than the base EDT value. Label Help text Form help Country region codes String size

QUESTION 2

A company has a cloud-based installation of Dynamics 365 Finance.

A user reports slow response times in the application when accessing the production environment.

You need to diagnose the performance issue by using the Environment monitoring tool.

Which two features of the Environment monitoring tool should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. System diagnostics

B. Customization analysis

C. Health metrics

D. Availability monitoring

E. SQL insights

Correct Answer: CE

CE: Environment monitoring is a simple way to access current activity on environments in your Finance and Operations apps implementation. By using the Environment Monitoring and SQL Insights that come in a user-friendly dashboard, you can see measurements and diagnostics of your environment's health. Within the Health metrics dashboard, some issues are reported directly to the Microsoft Service Engineering Team and some are mitigated immediately. If there are any concerns regarding performance, this is a good way to gain insight into potential issues.

E: All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment.

QUESTION 3

DRAG DROP

A company uses Dynamics 365 Supply Chain Management.

You need to monitor system performance.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

**Tools**

Activity monitoring

SQL insights

Health metrics

Answer Area**Requirement**

Determine what a user was doing during a specific time period

Identify the number of distinct user sessions

View a list of transaction locks

Tool

QUESTION 4

HOTSPOT

You are a Dynamics 365 Finance developer.

You have the following source control branches:

Branch	Associated environment
Dev	Development
Main	Test

You need to move the list of changesets from the development environment to the test environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Action	Branch
Select a starting branch for the merge operation.	<div>Dev</div> <div>Dev</div> <div>Main</div> <div>Main</div>
Select the source branch.	<div>Dev</div> <div>Dev</div> <div>Main</div>
Select the destination branch.	<div>Main</div> <div>Dev</div> <div>Main</div>

Correct Answer:

Action	Branch
Select a starting branch for the merge operation.	<div>Dev</div> <div>Dev</div> <div>Main</div> <div>Main</div>
Select the source branch.	<div>Dev</div> <div>Dev</div> <div>Main</div>
Select the destination branch.	<div>Main</div> <div>Dev</div> <div>Main</div>

QUESTION 5

You are a Dynamics 365 Finance developer.

You need to ensure that an integration is triggered when a specific process starts.

Which tool should you use to retrieve the status from the Production order?

- A. Batch job
- B. Periodic flow
- C. Business event
- D. Recurring Data Entity export

Correct Answer: C

Business events can be used as triggers from D365FO in Power Automate/MS Flow in an end to end way.
