QUESTION 1

A client is using Dynamics 365 Sales and Power BI with stringent security on read access to accounts.

You need to ensure that users will be unable to view restricted accounts in Power BI.

What should you recommend?

- A. Share the reports in Power BI to the same Microsoft Azure Active Directory (Azure AD) groups used in Dynamics 365 Sales.
- B. Embed the Power BI reports in Dynamics 365 Sales instead of sharing them by using Power BI to retain security.
- C. Set up the Data Export Service and use DirectQuery for reporting to include security roles.
- D. Add row-level security (RLS) roles to the DataSet in Power BI that matches the privileges assigned in Dynamics 365 Sales.

Correct Answer: D

QUESTION 2

You design a solution for a client that is moving from Microsoft Dynamics CRM on-premises to Dynamics 365 Sales.

During user acceptance testing, testers report significant performance issues.

You need to recommend a solution to mitigate the performance issues.

What should you recommend?

- A. Increase the plug-in execution time limit of the organization to five minutes.
- B. Create a Microsoft Azure Service Bus endpoint in Dynamics 365 Sales. Implement business logic in Azure functions.
- C. Enable direct access to a Microsoft Azure-replicated SQL database.
- D. Implement workflows. Schedule workflows to run at daily intervals.

Correct Answer: C

QUESTION 3

You need to recommend a solution that provides a seamless customer experience. What should you recommend?

- A. Business Process Flows
- B. Power Automate
- C. workflows
- D. task flows

Correct Answer: A

QUESTION 4

DRAG DROP

You are designing a business continuity strategy for a client who is using Dynamics 365 Sales.

The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

In which order should you recommend the actions be performed? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
If the second call is successful, the application continues normally.	
The application redirects calls to the established backup datacenter.	
The application redirects calls to an on-premises server.	
The application receives an exception after attempting the service call.	
The application automatically tries the call again.	
The application makes a service call to the datacenter.	

Navigation icons: Left arrow, Right arrow, Up arrow, Down arrow.

Correct Answer:

Actions	Answer Area
	The application makes a service call to the datacenter.
The application redirects calls to an on-premises server.	The application receives an exception after attempting the service call.
	The application redirects calls to the established backup datacenter.
	The application automatically tries the call again.
	If the second call is successful, the application continues normally.

QUESTION 5

A company is implementing Dynamics 365 Sales.

The company has an internal system for tracking time that salespeople spend on each account. This system must be integrated with Dynamics 365 Sales.

When a user submits a timesheet in the internal system, a record must be created in Dynamics 365 Sales. The timesheet has no external-facing APIs.

You need to recommend a solution for integration.

What should you recommend?

- A. Extend the time tracking system by creating a synchronous real-time workflow in Dynamics 365 Sales.
- B. Extend the time tracking system by calling the Web API.
- C. Create a Dynamics 365 Sales asynchronous background workflow to call data from the timesheet system.
- D. Create a plug-in to call data from the timesheet system.

Correct Answer: B
