## QUESTION 1

### HOTSPOT

A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

The company plans to continuously apply upgrades.

You need to determine which functions meet the requirements.

Which function meets each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

Requirement	Function
Enable click-by-click documentation of testing scenarios.	<div><div></div><div>Task recorder</div><div>Regression suite automation tool (RSAT)</div><div>Business process modeler</div></div>
Create test scenarios that contain multiple processes, each relying on data passed from the prior process.	<div><div></div><div>Chain test cases</div><div>Derived test cases</div><div>Individual test cases</div></div>
Develop test scenario variants of the same process that are run with different data sets.	<div><div></div><div>Chain test cases</div><div>Derived test cases</div><div>Individual test cases</div></div>

Correct Answer:

## Answer Area

### Requirement

### Function

Enable click-by-click documentation of testing scenarios.

	▼
Task recorder	
Regression suite automation tool (RSAT)	
Business process modeler	

Create test scenarios that contain multiple processes, each relying on data passed from the prior process.

	▼
Chain test cases	
Derived test cases	
Individual test cases	

Develop test scenario variants of the same process that are run with different data sets.

	▼
Chain test cases	
Derived test cases	
Individual test cases

## QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management. The company's main

priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the distribution centers and center data repository in the cloud.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance and Operations applications.

The company has the following security requirements:

1.

Employees working from home must use company-managed devices only to access the applications.

2.

Users with administrative roles must use multi-factor authentication (MFA).

You need to implement a security solution.

Solution: Create a network access control policy.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Correct:

\*

Create conditional access policies Incorrect:

\*

Create a network access control policy.

\*

Configure a network access control policy.

\*

Configure Dynamics 365 Finance security.

Note: Plan a Conditional Access deployment Microsoft Entra Conditional Access analyses signals such as user, device, and location to automate decisions and enforce organizational access policies for resources. Conditional Access

policies allow you to build conditions that manage security controls that can block access, require multifactor authentication, or restrict the user's session when needed and stay out of the user's way when not.

#### QUESTION 4

##### DRAG DROP

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

1.

Develop code.

2.

Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Requirement	Application
Customer additions	<div><div>▼</div><div>Power Apps app</div><div>Data Migration</div><div>Data migration framework</div></div>
Customer data validation	<div><div>▼</div><div>Power Automate</div><div>Data migration framework</div><div>Common Data Model</div><div>Dynamics 365 Finance workflows</div></div>

Correct Answer:

## Answer Area

### Requirement

Associate diagram to process

	▼
Business process modeler	
Power Automate	
Document handling	
Case management	

Testing of accounts payable and accounts receivable approval workflow process

	▼
Azure DevOps Services	
Business process modeler	
Regression suite automation tool (RSAT)	

Box 1: Lifecycle Services (LCS)

Deploying cloud development environments

To deploy a cloud development environment in your LCS project:

Create a connection between an LCS project and your Azure subscription. You will need your Azure subscription ID and authorize the use of the subscription.

Select + under Environments to deploy.

Select an application and platform version.

Select an environment topology. For more information, see [Sign up for preview subscriptions](#).

If you chose a cloud-hosted environment, select which Azure connector you want to use. Then select Deploy.

**Box 2: Azure DevOps**

Azure DevOps provides developer services for allowing teams to plan work, collaborate on code development, and build and deploy applications. Azure DevOps supports a collaborative culture and set of processes that bring together developers, project managers, and contributors to develop software.

**Box 3: Git**

Git is a DevOps tool used for source code management. It is a free and open-source version control system used to handle small to very large projects efficiently. Git is used to tracking changes in the source code, enabling multiple developers to work together on non- linear development.

---

**QUESTION 5****DRAG DROP**

A professional services company implements Dynamics 365 Finance using the FastTrack Success by Design framework.

You need to describe the various phases of the implementation to company stakeholders.

In which phase is the activity performed? To answer, drag the appropriate phases to the correct activities. Each phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

## Answer Area

### Users

### Recommendation

COO

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Warehouse employees

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Tasting room employees

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Base, Supply Chain Management, and Retail licenses
Base and Sale Professional licenses

Mobile scanner users

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Device licenses
Named User licenses

Correct Answer:

## Success by Design components

### Requirements

Identify the touchpoints that need to be aligned with the project dates.

Team that will help accomplish touchpoints.

### Components

	▼
Azure DevOps	
Success by Design	
Sure Step methodology	
VanPMP methodology	

	▼
Microsoft FastTrack	
Microsoft Support	
Proseware, Inc.	
VanArsdel, Ltd.
