### QUESTION 1

You have a computer named Computer1 that runs Windows 10.

On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History.

What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Correct Answer: B

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

### QUESTION 2

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

Correct Answer: See explanation below.

1.

After creating File1.txt in Folder1, right-click the file and select Properties.

2.

Access the Security tab, click Disable inheritance

3.

Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.

4.

Click OK

5.

Back on the Security tab select Edit to change permissions.

6.

Click Add, then enter User1 in the Enter the object names to select section.

7.

Click Check Names, and then click OK.

8.

Check only the Read box in the Allow column.

9.

Click apply, Ok, and OK

---

### QUESTION 3

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder.

Solution: from the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit system events.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Files and folders are objects and are audited through object access, not through system events.

### QUESTION 4

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user.

The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

# Activation

## Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

## Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure AD, assign a Windows 10 Enterprise license to the user.
- B. At the command prompt, run `slmgr /lrc`.
- C. Reinstall Windows as Windows 10 Enterprise.
- D. At the command prompt, run `slmgr /ato`.

Correct Answer: A

### QUESTION 5

You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune. You need to recommend a solution for help desk administrators that meets the following requirements:

1.

The administrators must assist users remotely by connecting to each user's computer.

2.

The remote connections must be initiated by the administrators. The users must approve the connection.

3.

Both the users and the administrators must be able to see the screen of the users' computer.

4.

The administrators must be able to make changes that require running applications as a member of each computer's Administrators group. Which tool should you include in the recommendation?

A. Remote Desktop

B. Intune

C. Remote Assistance

D. Quick Assist

Correct Answer: B

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/remote-assist-mobile-devices>
