QUESTION 1

HOTSPOT

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

	Statements		Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS).			<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS).			<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS).			<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

	Statements		Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS).			<input type="radio"/>	<input checked="" type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS).			<input checked="" type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS).			<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

User1 is a member of Group1. User1 does not have any permission to Image1.

Box 2: Yes

User1 has read permissions to Image2 through Group1.

Box 3: Yes

User2 has read permissions to Image3 through Group2.

QUESTION 2

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices.

You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy
- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

Correct Answer: B

There are two parts to compliance policies in Intune: Compliance policy settings and Device compliance policy.

Under "Compliance Policy Settings" itself, you can find the setting "Enhanced Jailbreak Detection (applies only to iOS/iPadOS)"

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

Answer B. Compliance policy settings These settings are generic and define the default behavior of the compliance policy. Here you can define what happens with a device which has no compliance policy assigned, by default this device will be marked as "Not Compliant". You can also configure the usage of "Enhanced jailbreak detection" which is only supported on iOS/iPadOS and uses location services to more regularly check for a jailbreak.

QUESTION 3

You manage 1,000 computers that run Windows 10. All the computers are enrolled in Microsoft Intune. You manage the servicing channel settings of the computers by using Intune.

You need to review the servicing status of a computer.

What should you do?

- A. From Device configuration - Profiles, view the device status.
- B. From Device compliance, view the device compliance.
- C. From Software updates, view the audit logs.

D. From Software updates, view the Per update ring deployment state.

Correct Answer: D

Reports for Update rings for Windows 10 and later policy.

Intune offers integrated report views for the Windows update ring policies you deploy. These views display details about the update ring deployment and status:

1.

Sign in to Microsoft Endpoint Manager admin center.

2.

Select Devices > Monitor. Then under Software updates select Per update ring deployment state and choose the deployment ring to review. Note: Windows 10 and later update rings " Use a built-in report that's ready by default when you deploy update rings to your devices.

QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device5 is marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 5

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company's environment includes a Microsoft 365 subscription.

Users in the company's sales division have personal iOS or Android devices that are enrolled in Microsoft Intune. New users are added to the sales division on a monthly basis.

After a mobile application is created for users in the sales division, you are instructed to make sure that the application can only be downloaded by the sales division users

Solution: You start by assigning the application to a group.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Before you can configure, assign, protect, or monitor apps, you must add them to Microsoft Intune.
