### QUESTION 1

You have an Azure AD tenant named contoso.com.

You plan to purchase 25 computers that run Windows 11. You plan to deliver the computers directly to users.

You need to ensure that during the out-of-box experience (OBE), users are prompted to sign in, and then the computers are configured to use Microsoft Intune.

Which two components should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a provisioning package
- B. automatic enrollment
- C. an unattend.xml answer file
- D. a Windows Autopilot deployment profile for self-deploying mode
- E. a Windows Autopilot deployment profile for user-driven mode

Correct Answer: BE

Reference: <https://learn.microsoft.com/en-us/windows/client-management/azure-ad-and-microsoft-intune-automatic-mdm-enrollment-in-the-new-portal> <https://learn.microsoft.com/en-us/autopilot/user-driven>

### QUESTION 2

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices.

You purchase a Microsoft 365 E5 subscription.

You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort.

Which upgrade method should you use?

- A. Windows Autopilot
- B. a Microsoft Deployment Toolkit (MDT) lite-touch deployment
- C. Subscription Activation
- D. an in-place upgrade by using Windows installation media

Correct Answer: C

Windows 10/11 Subscription Activation Windows 10 Pro supports the Subscription Activation feature, enabling users to “step-up” from Windows 10 Pro or Windows 11 Pro to Windows 10 Enterprise or Windows 11 Enterprise, respectively, if they are subscribed to Windows 10/11 Enterprise E3 or E5.

### QUESTION 3

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse.

What should you use to create the report?

- A. the Company Portal app
- B. Endpoint analytics
- C. the Azure portal app
- D. Microsoft Power BI

Correct Answer: D

Super easy start with reporting and the Intune Data Warehouse

Method 1: Load data using OData URL

The first method is loading data by using the OData URL.

Method 2: Load data and reports using Power BI file (pbix)

The second method is loading data and prebuilt reports using a downloaded Power BI file (pbix). That file contains the connection information for the tenant and contains a set of prebuilt reports based on the Intune Data Warehouse data model.

### QUESTION 4

You have the Windows 10 devices shown in the following table.

Name	Operating system	Edition
Device1	64-bit version of Windows 10	Home
Device2	32-bit version of Windows 10	Pro
Device3	64-bit version of Windows 10	Enterprise
Device4	64-bit version of Windows 10	Pro

You plan to upgrade the devices to Windows 11 Enterprise.

On which devices can you perform a direct in-place upgrade to Windows 11 Enterprise?

- A. Device3 only
- B. Device3 and Device 4 only
- C. Device2, Device3, and Device4 only
- D. Device1, Device3, and Device4 only
- E. Device1, Device2, Device3, and Device4 only

Correct Answer: B

---

### QUESTION 5

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

In the Out-of-Box Drivers node, you create folders that contain drivers for different hardware models.

You need to configure the Inject Drivers MDT task to use PnP detection to install the drivers for one of the hardware models.

What should you do first?

- A. Import an OS package.
- B. Create a selection profile.
- C. Add a Gather task to the task sequence.
- D. Add a Validate task to the task sequence.

Correct Answer: B

By default, MDT adds any storage and network drivers that you import to the boot images. However, you should add only the drivers that are necessary to the boot image. You can control which drivers are added by using selection profiles.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using-mdt>
