QUESTION 1

You have an Azure AD tenant that contains the devices shown in the following table.

Name	Operating system	Azure AD join type
Device1	Windows 11 Pro	Joined
Device2	Windows 11 Pro	Registered
Device3	Windows 10 Pro	Joined
Device4	Windows 10 Pro	Registered

You purchase Windows 11 Enterprise E5 licenses.

Which devices can use Subscription Activation to upgrade to Windows 11 Enterprise?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4

Correct Answer: A

The subscription upgrade conditions are: the same Windows OS type and the devices must be Azure AD joined.

QUESTION 2

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage Windows 11 devices.

You need to implement passwordless authentication that requires users to use number matching.

Which authentication method should you use?

- A. Microsoft Authenticator
- B. voice calls
- C. FIDO2 security keys
- D. text messages

Correct Answer: A

How number matching works in multifactor authentication (MFA) push notifications for Authenticator - Authentication methods policy This topic covers how number matching in Microsoft Authenticator push notifications improves user sign-in security. Number matching is a key security upgrade to traditional second factor notifications in Authenticator. Beginning May 8, 2023, number matching is enabled for all Authenticator push notifications. As relevant services deploy, users worldwide who are enabled for Authenticator push notifications will begin to see number matching in their

approval requests. Users can be enabled for Authenticator push notifications either in the Authentication methods policy or the legacy multifactor authentication policy if Notifications through mobile app is enabled.

QUESTION 3

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS.

What should you configure first?

- A. groups that have dynamic membership rules in Azure AD
- B. Device categories in Intune
- C. Corporate device identifiers in Intune
- D. Device settings in Azure AD

Correct Answer: A

We can create dynamic groups by using the deviceOSVersion or deviceOSType properties, and then apply Intune configuration policies to those groups.

QUESTION 4

You need to implement mobile device management (MDM) for personal devices that run Windows 11. The solution must meet the following requirements:

1.

Ensure that you can manage the personal devices by using Microsoft Intune.

2.

Ensure that users can access company data seamlessly from their personal devices.

3.

Ensure that users can only sign in to their personal devices by using their personal account. What should you use to add the devices to Azure AD?

- A. Azure AD registered
- B. hybrid Azure AD join
- C. Azure AD joined

Correct Answer: A

Azure AD registered devices are personal devices that are associated with Azure AD. This allows users to access company data from their personal devices without having to join the devices to the company's domain. Additionally, Azure AD registered devices can be managed by Microsoft Intune.

QUESTION 5

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

Correct Answer: C
