QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest.

You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

1.
Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
2.
User passwords must be 10 characters or more.

Solution: Implement password hash synchronization and modify the password settings from the Default Domain Policy in Active Directory.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

This solution meets the requirements:

1.
Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable. (this is because the authentication is performed by Azure Active Directory).
2.
Users passwords must be 10 characters or more. (the Default Domain Policy in the on-premise Active Directory can be configured to require the password length)

QUESTION 2

You need to recommend a model for the expense claims solution. What should you recommend?

- A. actionable messages via connectors that use an actionable message card
- B. actionable messages via email that uses an adaptive card
- C. actionable messages via connectors that use an adaptive card
- D. actionable messages via email that uses an actionable message card

Correct Answer: D

QUESTION 3

You need to consider the underlined segment to establish whether it is accurate.

Your company has a Microsoft 365 E3 subscription that only includes Windows 10 Pro devices, which are joined to Microsoft Azure Active Directory (Azure AD).

You have been tasked with making sure that the edition of Windows 10 is changed to Enterprise. The change must occur when users next sign in to their devices, and it also has to reduce the amount of interruption for the users.

You decide to make use of Windows Update.

Select "adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

What should you use?

- A. No adjustment required
- B. Azure AD Connect
- C. Windows Autopilot
- D. Microsoft Intune

Correct Answer: A

QUESTION 4

HOTSPOT

You need to recommend the development environment and tools for the redesign of the research department's SharePoint Online sites.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Development model:

	▼
Full-trust web parts	
Sandboxed solutions	
SharePoint Framework (SPFx)	

IDE:

	▼
Eclipse	
Microsoft Visual Studio	
Microsoft Visual Studio Code	

Front-end framework:

	▼
Bootstrap	
Fluent UI	
Material Design	

Correct Answer:

Development model: ▼
Full-trust web parts
Sandboxed solutions
SharePoint Framework (SPFx)

IDE: ▼
Eclipse
Microsoft Visual Studio
Microsoft Visual Studio Code

Front-end framework: ▼
Bootstrap
Fluent UI
Material Design

QUESTION 5

You need to configure Azure AD Connect to support the planned changes for the Montreal Users and Seattle Users OUs. What should you do?

- A. From PowerShell, run the Start-ADSyncCycle cmdlet.
- B. From the Microsoft Azure Active Directory Connect wizard, select Manage federation.
- C. From PowerShell, run the Add-ADSyncConnectorAttributeInclusion cmdlet.
- D. From the Microsoft Azure Active Directory Connect wizard, select Customize synchronization options.

Correct Answer: D
