QUESTION 1

You have a Microsoft 365 E5 tenant that contains two groups named Group1 and Group2.

You need to prevent the members of Group1 from communicating with the members of Group2 by using Microsoft Teams. The solution must comply with regulatory requirements and must not affect other users in the tenant.

What should you use?

- A. administrative units in Azure Active Directory (Azure AD)
- B. information barriers
- C. moderated distribution groups
- D. communication compliance policies

Correct Answer: B

Explanation:

Microsoft Purview Information Barriers (IBs) are policies that an admin can configure to prevent individuals or groups from communicating with each other.

Reference: <https://docs.microsoft.com/en-us/microsoftteams/information-barriers-in-teams>

QUESTION 2

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices.

You perform a proof of concept (PoC) deployment of Windows Defender Advanced Threat Protection (ATP) for 10 test devices. During the onboarding process, you configure Windows Defender ATP-related data to be stored in the United States.

You plan to onboard all the devices to Windows Defender ATP.

You need to store the Windows Defender ATP data in Europe.

What should you first?

- A. Create a workspace.
- B. Onboard a new device.
- C. Delete the workspace.
- D. Offboard the test devices.

Correct Answer: D

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security and Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From the Azure Active Directory admin center, you create a conditional access policy.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

Your on-premises network contains the device types shown in the following table.

Name	Operating system	Drive encryption	BIOS	Image type
Type1	32-bit version of Windows 10 Pro	None	Legacy	Standard
Type2	64-bit version of Windows 8.1 Pro	None	Legacy	Start from VHD
Type3	64-bit version of Windows 8.1 Pro	BitLocker Drive Encryption (BitLocker)	Legacy	Custom
Type4	64-bit version of Windows 8.1 Pro	BitLocker Drive Encryption (BitLocker)	UEFI	Standard
Type5	64-bit version of Windows 8.1 Pro	None	Legacy	Standard

You plan to deploy an in-place upgrade to a 64-bit version of Windows 10 Enterprise by using the Microsoft Deployment Toolkit (MDT).

Which device types will support an in-place upgrade?

- A. Type4 and Type5 only
- B. Type3, Type4, and Type5 only
- C. Type1, Type4, and Type5 only
- D. Type1, Type2, and Type5 only

Correct Answer: A

Explanation:

MDT has many useful features, such as:

*

UEFI support. Supports deployment to machines using Unified Extensible Firmware Interface (UEFI) version 2.3.1.

*

Offline BitLocker. Provides the capability to have BitLocker enabled during the Windows Preinstallation Environment (Windows PE) phase, thus saving hours of encryption time.

*

Deploy to VHD. Provides ready-made task sequence templates for deploying Windows into a virtual hard disk (VHD) file.

Incorrect:

Not Type1: The upgrade process cannot change from a 32-bit operating system to a 64-bit due to the possible complications with drivers and applications it may bring.

Not Type2, not Type3: Boot images are the Windows Preinstallation Environment (Windows PE) images that are used to start the deployment.

You're not able to use a custom image of Windows 10 for the In-Place Upgrade scenario. You'd have to use the install.wim image provided with the latest Windows 10 media that Microsoft has released.

QUESTION 5

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that contains a user named User1.

You need to enable User1 to create Compliance Manager assessments.

Solution: From the Microsoft 365 admin center, you assign User1 the Compliance admin role.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
