QUESTION 1

You have a Microsoft Exchange Server 2019 organization.

You have the groups shown in the following table.

Name	Type	Scope
Group1	Security	Universal
Group2	Distribution	Universal
Group3	Security	Global
Group4	Distribution	Global
Group5	Security	Domain local

You plan to create a new management role assignment by running the following command.

```
New-ManagementRoleAssignment -Role "Litware DB Admins"
```

```
-SecurityGroup -ExclusiveConfigWriteScope "Scope1"
```

Which group can you use as the value for the SecurityGroup parameter?

- A. Group1
- B. Group2
- C. Group3
- D. Group4
- E. Group5

Correct Answer: A

References: <https://docs.microsoft.com/en-us/exchange/permissions/permissions?view=exchserver-2019>

QUESTION 2

You deploy a Microsoft Exchange Server 2019 organization.

You need to ensure that users of all new mailboxes are prevented from editing their personal information.

What should you do?

- A. From PowerShell, run the New-RoleGroup cmdlet and specify the ?ustomRecipientWritesScope parameter.
- B. From the Exchange admin center, create a new role assignment policy.
- C. From the Exchange admin center, run a new role group and assign the role group to Domain users.

D. From PowerShell, run the New-RoleAssignmentPolicy cmdlet and specify the ?sDefault parameter.

Correct Answer: D

QUESTION 3

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to implement a solution that meets the technical requirements for the retention of junk email, sent items, and deleted items.

What is the minimum number of retention policies and retention tags you should use? To answer, select the appropriate

options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Retention tags:

	▼
1	
2	
3	
14	
30	

Retention policies:

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problemstatements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to configure the Exchange organization to meet the security requirements for sending email messages to distribution groups.

Which cmdlet should you run?

- A. Set-OrganizationConfig
- B. Set-DistributionGroup
- C. Set-Mailbox
- D. New-PolicyipConfig

Correct Answer: A

References: <https://docs.microsoft.com/en-us/powershell/module/exchange/organization/set-organizationconfig?view=exchange-ps>

QUESTION 5

You have a Microsoft Exchange Server 2019 organization.

You deploy a new mailbox server named EX01.

You need to ensure that EX01 can perform content filtering and sender filtering.

What should you run first?

- A. Install-UnifiedCompliancePrerequisite
- B. Set-transportAgent
- C. Install-AntiSpamAgents.ps1

D. Set-MailboxJunkEmailConfiguration

Correct Answer: C
