QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Exchange Server 2019 hybrid deployment that contains two Mailbox servers named MBX1 and MBX2.

The company has the departments shown in the following table.

Name	Source	Subject name
Cert1	Self-signed	server1.contoso.com
Cert2	Internal certification authority (CA)	*
Cert3	Internal certification authority (CA)	contoso.com and autodiscover.contoso.com
Cert4	Public certification authority (CA)	*
Cert5	Public certification authority (CA)	contoso.com and autodiscover.contoso.com

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups.

You are informed that some sales department users send email messages that are identified as spam.

You need to automatically block the sales department users from repeatedly sending spam.

Solution: You modify the outbound spam filter policy in Exchange Online.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups. Therefore, the Exchange Online outbound spam filter will not scan the emails sent from the on-premises mailboxes.

QUESTION 2

HOTSPOT

Your company purchases new mobile devices for each user in its sales department and marketing department. The new devices only support Exchange ActiveSync.

You need to configure mobile device access to meet the following requirements:

1.
Apply a specific password policy to all the sales department users.
2.
Prevent all the marketing department users from using ActiveSync to access their mailbox from their new mobile devices.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

DNS records:

	▼
Mail exchanger (MX)	
Alias (CNAME)	
Host (A)	
Service location (SRV)	

Exchange Online configuration:

	▼
One inbound connector and one Outbound connector	
One inbound connector only	
One Outbound connector only	
One remote domain and one accepted domain	

Correct Answer:

Answer Area

DNS records:

	▼
Mail exchanger (MX)	
Alias (CNAME)	
Host (A)	
Service location (SRV)	

Exchange Online configuration:

	▼
One inbound connector and one Outbound connector	
One inbound connector only	
One Outbound connector only	
One remote domain and one accepted domain	

QUESTION 3

You need to resolve the issue for the customer service department users. What should you modify?

- A. a transport rule
- B. the Send connector to the Internet
- C. the tarpit interval
- D. the global throttling policy

Correct Answer: D

QUESTION 4

You have a Microsoft Exchange Server 2019 organization.

You implement hybrid connectivity to Microsoft 365.

You need to ensure that users can use the Microsoft Outlook mobile app on their device to access their onpremises mailbox.

What should you do?

- A. Run Azure AD Connect.
- B. Run Set-CASMailbox -OutlookMobileEnabled for each user.
- C. Enable Hybrid Modern Authentication (HMA).
- D. Configure Active Directory Federation Services (AD FS).

Correct Answer: C

QUESTION 5

You have a Microsoft Exchange Server 2019 organization.

Users access their email by using Microsoft Outlook 2019.

The users report that when a mailbox is provisioned for a new user, there is a delay of many hours before the new user appears in the global address list (GAL). From Outlook on the web, the users can see the new user in the GAL

immediately.

You need to reduce the amount of time it takes for new users to appear in the GAL in Outlook 2019.

What should you do?

- A. Modify the default email address policy.
- B. Create an address book policy (ABP).
- C. Create a scheduled task that runs the Update-GlobalAddressList cmdlet.
- D. Modify the offline address (OAB) schedule.

Correct Answer: D
