### QUESTION 1

You have two servers named EXCH1 and EXCH2 that run Windows Server 2012 R2 and have Microsoft Exchange 2016 installed.

You purchase a Microsoft 365 subscription.

You plan to configure a hybrid deployment between an Exchange Online tenant and the on- premises Exchange Server Organization.

You need to identify the prerequisites to installing the Microsoft Hybrid Agent on EXCH1 and EXCH2.

Which two prerequisites should you identify?

Each correct answer presents part of the solution.

- A. All outbound HTTPS connections to Microsoft Online Services
- B. Enable Hybrid Modern Authentication (HMA).
- C. Upgrade the operating system of EXCH1 and EXCH2 to Windows Server 2019.
- D. Enable TLS 1.2.

Correct Answer: AD

- A. All outbound HTTPS connections to Microsoft Online Services

Reference: <https://docs.microsoft.com/en-us/exchange/hybrid-deployment/prepare-for-hybrid-deployment>

To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that all outbound HTTPS connections to Microsoft Online Services are allowed. This is a prerequisite

for installing the Microsoft Hybrid Agent.

- D. Enable TLS 1.2.

Reference: <https://docs.microsoft.com/en-us/exchange/hybrid-deployment/prepare-for-hybrid-deployment>

To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that Transport Layer Security (TLS) 1.2 is enabled on your on-premises Exchange servers. This is a

prerequisite for installing the Microsoft Hybrid Agent.

---

### QUESTION 2

You have a Microsoft Exchange Online tenant.

You need to perform an In-Place eDiscovery search. The solution must meet the following requirements:

- 1.

Minimize administrative effort.

2.

Search both public folders and mailboxes.

3.

Use an In-Place Hold to place the search results on hold. What should you do in the Microsoft 365 compliance center?

A. Search the public folders and the mailboxes in a single search, and then place the results on In-Place Hold.

B. Search the public folders first, and then place the results on In-Place Hold. Search the mailboxes second, and then place the results on In-Place Hold.

C. Search the public folders and the mailboxes in a single search. Once the search completes, place only the mailboxes that contain results and the public folders on In-Place Hold.

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/exchange/policy-and-compliance/ediscovery/search-public-folders?view=exchserver-2019>

---

### QUESTION 3

You have a Microsoft Exchange Online tenant that contains a mailbox named Sales.

You need to create a copy of all the external email sent from the Sales mailbox to an alternate location.

What should you create?

A. a journaling rule

B. a retention policy

C. a records management file plan

D. a data loss prevention (DLP) policy

Correct Answer: A

Explanation:

Journaling in Exchange Online

When possible, we recommend that you use Microsoft 365 retention to archive and manage data in-place to meet your compliance requirements. However, some organizations might need to use a third-party solution to receive a copy of emails for storage or other scenarios. Configure journaling to store that data outside Exchange.

Journal rules

The following are key aspects of journal rules:

Journal rule scope: Defines which messages are journaled by the Journaling agent.

Journal recipient: Specifies the SMTP address of the recipient you want to journal.

Journaling mailbox: Specifies one or more mailboxes used for collecting journal reports.

Incorrect:

\*

a retention policy

Managing content commonly requires two actions:

\*

Retain content

Prevent permanent deletion and remain available for eDiscovery

\*

Delete content

Permanently delete content from your organization

With these two retention actions, you can configure retention settings for the following outcomes:

Retain-only: Retain content forever or for a specified period of time.

Delete-only: Permanently delete content after a specified period of time.

Retain and then delete: Retain content for a specified period of time and then permanently delete it.

These retention settings work with content in place that saves you the additional overheads of creating and configuring additional storage when you need to retain content for compliance reasons. In addition, you don't need to implement customized processes to copy and synchronize this data.

#### QUESTION 4

You have a Microsoft Exchange Online tenant.

All users use an email address suffix of @contoso.com.

You need to ensure that all the email messages sent to users who use an email address suffix of @fabrikam.com are encrypted automatically. The solution must ensure that the messages can be inspected for data loss prevention (DLP) rules

before they are encrypted.

What should you create?

A. an Outbound connector

- B. a safe attachments policy
- C. a remote domain
- D. a mail flow rule

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/microsoft-365/compliance/define-mail-flow-rules-to-encrypt-email?view=o365-worldwide> <https://docs.microsoft.com/en-us/exchange/security-and-compliance/data-loss-prevention/data-loss-prevention>

---

### QUESTION 5

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization.

The tenant uses an email domain named @contoso.com.

You recently purchased an email domain named fabrikam.com.

You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE; Each correct selection is worth one point.

- A. From Azure AD Connect add a domain for fabrikam.com.
- B. From the on-premises Exchange admin center, add an accepted domain for fabrikam.com.
- C. From the Exchange Management Shell, create a script that runs the
- D. From the Microsoft 365 admin center, verify the fabrikam.com email domain
- E. From the on-premises Exchange admin center, modify the email address policy
- F. From the Microsoft 365 admin center, add the fabrikam.com email domain.

Correct Answer: BDE
