QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Exchange Online tenant that contains 2,000 mailboxes.

A partner company named Fabrikam, Inc. uses a third-party messaging solution. The outbound SMTP server for Fabrikam uses an IP address of 131.107.2.22.

You discover that several email messages from the fabrikam.com domain are erroneously marked as spam.

You need to ensure that all the email messages sent from the fabrikam.com domain are delivered successfully to the user mailboxes of your company.

Solution: You create a connection filter.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

You can allow the server IP address in the Connection Filter. This would achieve the objective of ensuring all email from Fabrikam.com is delivered. However, it would also allow any other company that uses the thirdparty email server to bypass the spam filter.

The fact that the question specifies that Fabrikam uses a "third-party messaging solution" suggests that the answer to this question should be No although technically it would work.

QUESTION 2

HOTSPOT

You have a Microsoft Exchange Server 2019 hybrid deployment named contoso.com.

You are preparing to migrate several user mailboxes to Microsoft 365.

You have an on-premises Mailbox server named server1.contoso.com.

You need to create a migration endpoint.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Admin1:

	▼
All actions are recorded.	
No actions are recorded.	
Only the addition of User1 is recorded.	
Only the running of New-Mailbox is recorded.	

Admin2:

	▼
All actions are recorded.	
No actions are recorded.	
Only the running of Search-Mailbox is recorded.	
Only the running of Test-ApplicationAccessPolicy is recorded.	

Correct Answer:

DNS feature to enable:

DNS delegation
DNS zone transfer
DNSSEC
Microsoft Defender for DNS

Type of DNS record to create:

CNAME
MX
SRV
TLSA
TXT

You plan to migrate to Microsoft Exchange Online. The solution must meet the following requirements.

1.

Messages sent by the research and development department at your company must be routed to the internet through an on-premises data loss prevention (DLP) appliance.

2.

The actual source of the messages received by Exchange Online from a third-party cloud filtering service must be identified.

What features should you use to meet the requirements? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

For the sales department users:

	▼
Create a mobile device access rule.	
Create and assign a mobile device policy.	
Create a client access rule scoped to the users.	

For the marketing department users:

	▼
Run the Set-Mailbox cmdlet.	
Run the Set-CasMailbox cmdlet.	
Run the Set-ActiveSyncDeviceAccess Rule cmdlet.	

Correct Answer:

Answer Area

For the sales department users:

	▼
Create a mobile device access rule.	
Create and assign a mobile device policy.	
Create a client access rule scoped to the users.	

For the marketing department users:

	▼
Run the Set-Mailbox cmdlet.	
Run the Set-CasMailbox cmdlet.	
Run the Set-ActiveSyncDeviceAccess Rule cmdlet.

QUESTION 4

HOTSPOT

You create a transport rule as shown in the following exhibit.

**Answer Area**

Statements	Yes	No
The user mailboxes of the marketing department will have an additional email address that uses a SMTP suffix of @marketing.contoso.com.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
The user mailbox of a sales department user named Ben Smith will have an email address of b.smith@contoso.com.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
All user mailboxes will have an email address in the firstname.lastname@contoso.com format.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Name	Member of
User1	Sales
User2	Managers

Correct Answer:

Mail flow scenario

From: Office 365

To: Partner organization

Name

TLS to Contoso

Description

None

Status

Turn it on after saving

When to use the connector

Use only when I have a transport rule set up that redirects messages to this connector.

Routing method

Use the MX record associated with the partner's domain.

Security restrictions

Always use Transport Layer Security (TLS) and connect only if the recipient's email server has a digital certificate.

Reference: <https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance/new-transportrule?view=exchange-ps>

QUESTION 5

You have an Exchange Online tenant.

You need to ensure that the users in your company's finance department can select email messages that will be deleted automatically one year later. The solution must apply only to the finance department users.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Publish a label to the finance department.
- B. Create a data loss prevention (DLP) policy that uses the sensitive information type.
- C. For each mailbox in the finance department, configure the retention policy settings.
- D. Create a label that has a retention setting of one year.
- E. For each mailbox in the finance department, configure Message Delivery Restrictions.

Correct Answer: AD

Create a retention label and publish it to the finance department users.
